For the purposes of the Annual Report, Job Placement Rate is defined as the percentage of students who are employed in the year following completion of a CTE (career-technical education) certificate or degree program. (This means that the denominator for the 2021-2022 job placement rate will be the number of students who completed the program in 2020-2021.) Report only those programs with a minimum of 10 students in the completion year. For example, if a program had 9 students complete in 2020-2021, you do not need to report a job placement rate for 2021-2022. Report only those programs for which reliable data are available. If your institution has defined its job placement rate differently than what is described above, you may complete this question using your local definition provided that you describe this definition in Question 19.

Our institution has programs that meet these conditions.
