

Introduction: Welcome to META

curriQūnet META is a curriculum development, review, and approval system that addresses campus, statewide, and international collaborative issues in curriculum management and accreditation. META provides non-technical users the ability to configure and modify web entry screens and workflow templates.

Every institution develops unique curriculum management processes. This is true even where an institution is part of a regional or statewide system. META enhances and streamlines the user experience with customizable tools that are highly intuitive.

The core curriQūnet META system is designed to be configurable to reflect local requirements, while still properly interfacing components with upstream and downstream systems. This functionality includes local student systems, multi-campus curriculum searches, state reporting standards, and similar requirements.

META is a web-based application. Browser display variances may cause your screens to look slightly different from the screenshots in this guide. Supported browsers include Microsoft Edge, Google Chrome, Mozilla Firefox, and Safari. META is not currently optimized for mobile devices such as tablets and smart phones.

Your institution has one or more META administrators, usually located in the curriculum office. If you need additional assistance in using META, or have questions about the information required, please contact your administrators. Your META administrators are your best resource.

curriQūnet META allows each client to have customized workflows, and a secure, private database while maintaining a single codebase. This enables our implementation and support teams to focus on our clients while our development team constantly improves the product. The flexible nature of curriQūnet META means there is a nearly infinite combination of field types and functionalities to collect data in the format required.

This guide will highlight specific field types and provide instruction on META specific features. Your institution may provide instructional materials that dive deeper into the specific proposal types you will encounter or include more specific instructions about the types of information they expect.

Conventions in This Tutorial

All references to any specific college (logos, contact information, etc.) and identifying information have been removed from screenshots and either blocked out or provided with a generic replacement/curriQūnet logo.

Actions to be taken in this tutorial include either actions by keyboard or actions by pointing device. Where possible these actions are shown as follows:

 *Keyboard Action*

 *Pointing Device Action*

Information of particular importance is shown as:

 NOTE: Additional information of note.

Getting Started: Accessing META

Your institution will provide you with the URL to access your META system. The URL generally follows the formula (institution name).curriqnet.com.

If your institution's META system is using a single sign on system, your log in screen will not look like the screenshot below, but will appear the same as the log in screens across your college's resources.

There are two places that can be used to login: The login button at the top right of the screen (1), or the login button at the bottom of the "Log in to CurriQunet META" section (2). They both take you to the same screen to complete user login.

The screenshot displays the CurriQunet META system interface. At the top right, there is a "Login" button with a red circle containing the number "1" next to it. Below this, there are "Selections" and "Filters" sections. The "Selections" section includes a "Curriculum Type" dropdown menu. The "Filters" section includes a "Status" dropdown menu with a red circle containing the number "1" next to it. Below the filters, there is a "Reset" button, a "Keyword Search" input field, and a "Search" button with a magnifying glass icon. The main content area is divided into two sections. The first section is titled "Find Courses or Programs" and includes a search icon and a text box with instructions: "Select Courses or Programs from the 'Type' dropdown at the top of the page. Enter the course or program in the 'Keyword Search'. To refine your search, use the College or Subject filters." The second section is titled "Log in to CurriQunet META" and includes a lock icon and the text "Please log in to the system to:". Below this text is a list of three bullet points: "Create a Proposal (Create, Edit, Reinstate, or Archive a Course or Program)", "Review In-Progress Proposals", and "Run Reports". At the bottom of this section, there is a "Login" button with a red circle containing the number "2" next to it.

Logging In

You will be provided with your login credentials by the META administrators at your institution. You will log in with your email address (usually the address assigned by your institution) and you will be given a temporary password.

Upon logging in for the first time, you **must** change your password from this temporary password to protect your institution's data and security.

Getting Started: Accessing META - continued

Logging In - continued

Log in to CurriQunet META ×

Email

Password

[Sign in](#)

[Forgot your password?](#) [Request access](#)

Enter your email and password and click 'Sign in' to begin working in META.
If your college uses a single sign-on system, you will receive instruction from your META administrators on how to log in.

Getting Started: Accessing META - continued

Landing Page

The landing page will always be the Course Search screen. There are several features available on the Course Search screen, described below.

1. Gear Icon. The gear icon allows you access to the following functions -

- Edit your profile.
- Administer Site. (This option will not be available for non-administrative users.)
- Log Off.

2. User ID. Your user ID is the email address you supplied when you set up your META account.

3. Create Proposal: This button will open the Create Proposal page.

4. Approvals: This allows you to view and search items awaiting your review in an approval process.

5. Curriculum: This allows you to view and search Course, Program, Package, Assessment, or Program Review proposals. Curriculum types may vary depending on institution configuration.

6. Logo: School or curriQūnet logo. This is a link. Click it at any time during your session to return to the Course Search page.

7. Institution ID: The name of the college or institution you are logged into.

8. Keyword Search: Type here (course name, code, etc.) to make your search specific.

9. Search Button: Click here to perform a search.

10. Search Filters: Filter by subject, proposal type, status, or sort options to narrow your search.

11. Export Button: This feature allows you to export your search results in Excel, Word or PDF formats.

12. Search Results Window: Results of your searches will appear here. For instructions on how to use the search screens, see the **Searching Curriculum** section of this guide (starting on p. 14).

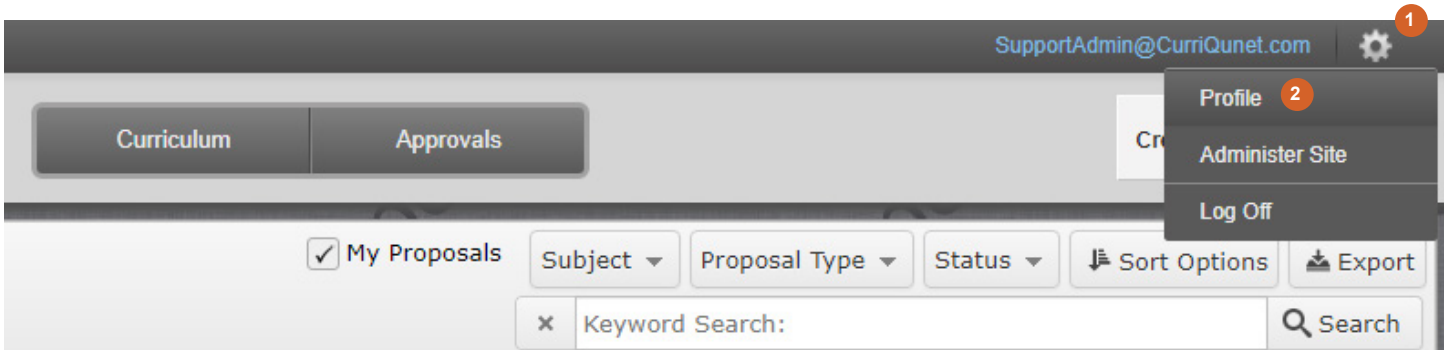

13. No Selection: A scope filter - not every institution has this.

14. My Proposals: When selected, this will only show proposals that you have originated. If an admin user is logged in, they will want to uncheck this to see all proposals.

Profile Management

The first time you log in, you will need to check your user information to verify it is correct.

 To access Profile Management, click the gear icon at the top right of your screen and then select Profile from the dropdown.

Edit Profile

Changing Your Password

Unless your college uses single sign-on, you **must** change your password the first time you log in. You should also periodically change your password for security purposes.

Edit Profile

Account Info

Email SupportAdmin@CurriQunet.com

Password [Click here to change your password](#)

➤ *Navigate to the Profile area (as described in the previous section) and click the blue link 'Click here to change your password.'*

Change Password

Use the form below to change your password.

New passwords are required to be a minimum of 6 characters in length.

Current password

New password

Confirm new password

Change Password

Cancel

➤ *Enter your current password, then enter and confirm your new password.*

Passwords must be at least 6 characters long, are case sensitive, and may include letters, numbers, and symbols. Make sure your password is something you can remember.

Passwords cannot be retrieved, but you may reset your password if you forget it (see section: **Resetting Your Password** on the next page).

Profile Management - continued

Resetting Your Password

Log in to CurriQunet META ×

Email

Password

[Sign in](#)

[Forgot your password?](#) [Request access](#)

➤ On the login screen, click 'Forgot your password?'

Request to Reset Password ×

Enter your Email

[Reset Password](#)

🗨️ ➤ Enter your email as instructed, and click 'Reset Password.'

You will receive an email with instructions on how to reset your password.

⚠️ NOTE: The password reset emails are included with general notification emails, and may not be sent immediately, depending on the notification configuration for your institution.

If you do not receive a password reset email within 24 hours of your request, please contact your META administrator.

Troubleshooting

Clearing the Browser Cache

Many problems encountered in META can be resolved by simply clearing the cache on your internet browser. This is usually found under the Settings menu in your browser.

You can also use the keyboard commands **Ctrl+Shift+Enter** (in Chrome), **Ctrl+Shift+Del** (in Firefox) or **Ctrl+R** (in Microsoft Edge). If you use a different browser and are unsure of how to proceed, search your browser's Help menu for "clear cache."

After clearing the cache, refresh the window. You may be logged out of META and need to log back in.

Updating the Browser

If clearing the cache does not resolve your issue, you may not be using the most recent version of the internet browser. In the Settings menu of your browser, check for updates.

If you have the permission to do so on your computer, update your browser to the most recent version. You may need to log in again after updating.

Submitting an Issue

Your META administrators are your best resource. Should you receive an error message of any kind, or the suggestions above do not resolve your issue, please inform your administrators immediately. They may be able to help you, or they may need to contact the currIQūnet support team to resolve the issue.

To help resolve any issues, the following information can help expedite your issue:

- A screenshot of the error encountered, **including the URL** (this is very important).
- The browser you were using, and if possible, the version of that browser (usually available in the Settings menu for your browser).
- What you were attempting to do, including (if possible) the exact steps you took that resulted in the error. Being able to reproduce the error is vital for the currIQūnet support team to be able to fix the problem.

Searching Curriculum

All screenshots in this guide will be from the course search feature, but the appearance and functionality is the same across all curriculum types.

Depending on your institution's configuration, you may see more or less columns than appear in the screenshots of the search results, but your search filters and the functionality are as described.

Upon logging in, the default view will be courses in all statuses originated by the user.

Courses						
<input checked="" type="checkbox"/> My Proposals						
Subject		Proposal Type		Status		Sort Options
x Keyword Search: <input type="text"/> <input type="button" value="Search"/>						
Subject	Course #	Title	Type	Status	Reports	
ACC	1000	ACC 1000 - Test	New Undergraduate Course	Draft		

Proposals for which you are a co-contributor will appear highlighted green.

Courses						
<input checked="" type="checkbox"/> My Proposals						
Subject		Proposal Type		Status		Sort Options
x Keyword Search: <input type="text"/> <input type="button" value="Search"/>						
Subject	Course #	Title	Type	Status	Reports	
ACC	1000	ACC 1000 - Test	New Undergraduate Course	Draft		

If the user has no courses, the screen will appear as follows:

Courses						
<input checked="" type="checkbox"/> My Proposals						
Subject		Proposal Type		Status		Sort Options
x Keyword Search: <input type="text"/> <input type="button" value="Search"/>						
Subject	Course #	Title	Type	Status	Reports	
You have no current proposals. Check your filters above. To search other curriculum, use the filters above and click search. If you would like to create a new proposal, click on the "Create Proposal" at the top of the screen.						

Searching Curriculum - continued

Keyword Search

The screenshot shows the top of the 'Courses' page. On the left is the 'Courses' title. To its right is a 'My Proposals' checkbox. Further right are four filter buttons: 'Subject', 'Proposal Type', 'Status', and 'Sort Options', each with a dropdown arrow. To the right of these is an 'Export' button with a download icon. Below these is a search box labeled 'Keyword Search:' with a magnifying glass icon to its right and an 'X' icon to its left. A red circle '1' is next to the search box, and a red circle '2' is next to the magnifying glass icon. A red circle '3' is next to the 'X' icon. Below the search box is a table header with columns: 'Subject', 'Course #', 'Title', 'Type', 'Status', and 'Reports'. Below the table header is a message: 'You have no current proposals. Check your filters above. To search other curriculum, use the filters above and click search. If you would like to create a new proposal, click on the "Create Proposal" at the top of the screen.'

Enter search terms in the Keyword Search textbox (1). Click the 'Search' button with the magnifying glass icon (2) to the right of the box to perform a search using the term, or the 'X' button (3) to the left of the box to remove the term..

Only items that meet the criteria of both keywords and any filters applied will appear in the results.

The keyword option searches the hierarchy, proposal title, and proposal description. The search engine will search for the exact phrase entered, including any spaces or numbers.

Adding a comma between keywords will add an implicit "or" to the search. For example "cell biology" will search for the exact phrase "cell biology." On the other hand, "cell, biology" will search for all proposals that include the word "cell" or the word "biology" in their hierarchy, proposal title, and proposal description.

Filtering Search Results

This screenshot is similar to the one above, but the filter buttons 'Subject', 'Proposal Type', 'Status', and 'Sort Options' are highlighted with a red rectangular box. The search box and other elements are the same.

You can add filters to your search results by clicking the 'Subject', 'Proposal Type', 'Status', and/or 'Sort Options' dropdown menus.

Scope Filter

This screenshot shows the 'Courses' search interface with a dropdown menu open under the 'Subject' filter. The dropdown menu has a title 'Please choose a type:' and three options: 'No Selection' (highlighted in blue), a redacted option, and 'Distance Education Addendum'. A red circle '1' is next to the dropdown menu. The search box and other elements are the same as in the previous screenshots.

If your institution has a scope filter, use the dropdown menu (1) to select the scope of the search.

Not all institutions have a scope filter. Only one filter from this menu can be applied to a search at a time. Filter options vary depending on your institution's configuration.

Navigation: 1 2 3 4 5 3 4 1-25 of 106

➤ Navigate between the pages using the navigator at the bottom of the screen (3). The result range (4) indicates the visible proposals and the total number of proposals in the search results that meet the selected search criteria.

Creating and Viewing Curriculum

Click the 'Curriculum' button (1) at the top of the page.

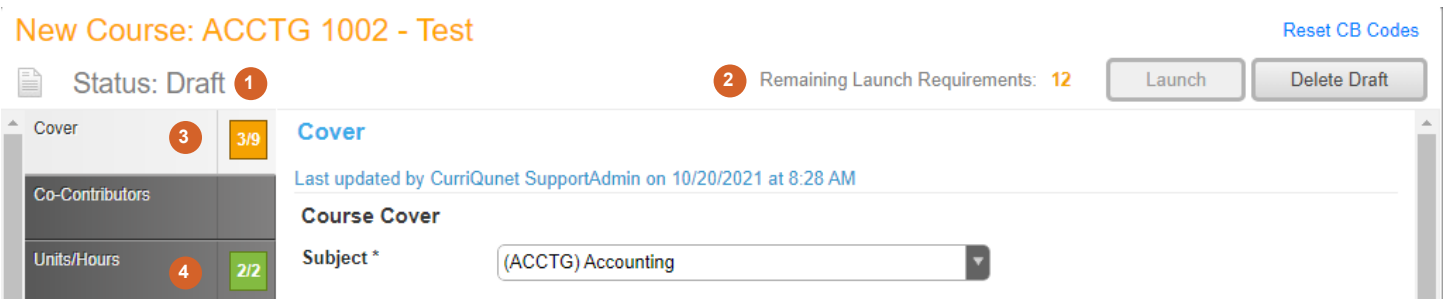

A dropdown menu will appear with the curriculum and assessment types that your institution uses META to manage. Curriculum options will be explained throughout this part of the tutorial, although the process is similar with all options.

Status, Launch Requirements, Tabs, and Badges

When you enter a proposal that has not yet been launched, you will see the “Draft” status (1), any remaining launch requirements (2), the dark gray tabs on the left which indicate the different sections/pages of a proposal, and badges (3) which indicate which launch requirements have or have not been met in each section. When all launch requirements in a section are completed, badges will change from yellow to green (4). The number of remaining launch requirements will also change accordingly.

New Course: ACCTG 1002 - Test

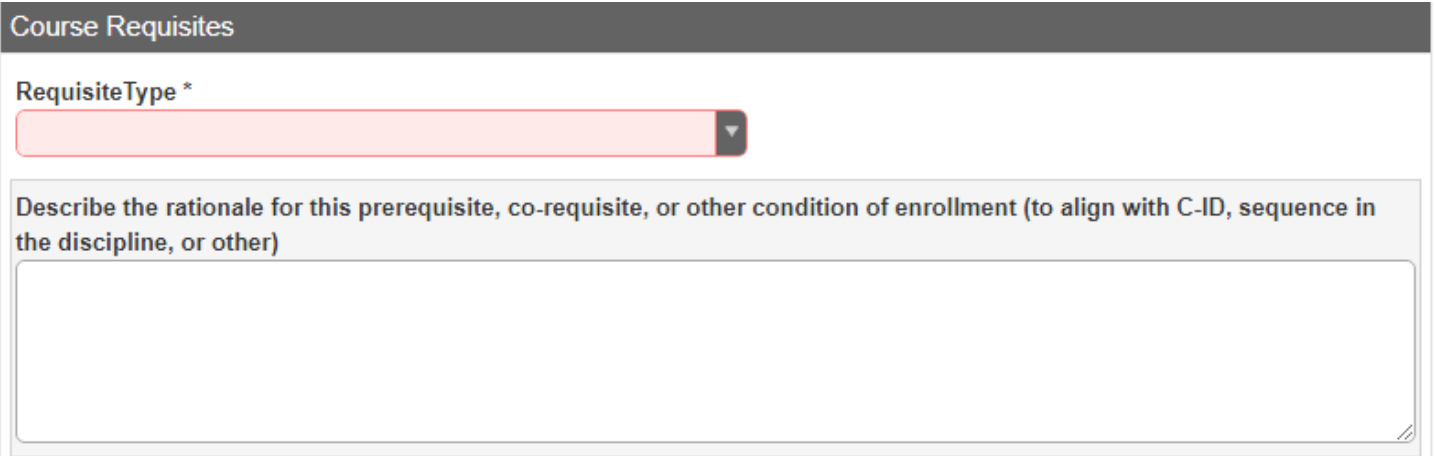

! NOTE: Some proposals for certain institutions may also have state requirements in addition to regular launch requirements. In that case, remaining state requirements will show at the top of the screen as well. State requirement badges for a section will be blue when incomplete and change to green when they are completed.

Creating and Viewing Curriculum - continued

Save Requirements

When you see textboxes highlighted in pink, they are "save requirements." These differ from launch requirements because they are not necessarily required to launch the proposal, but they are required to save a particular item (such as an item in a list or a grid) to the proposal.

Course Requisites

RequisiteType *

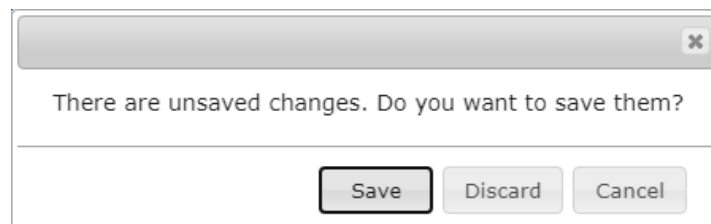

Describe the rationale for this prerequisite, co-requisite, or other condition of enrollment (to align with C-ID, sequence in the discipline, or other)

Saving Tabs

Whenever you are in a tab on the proposal form and you type new information into a textbox, click a checkbox or radio button, select an option from a dropdown menu, or make any other changes, a Save button will populate at the bottom of the proposal.

Click the "Save" button to save your work before navigating to another tab or out of the proposal. If you do not click "Save" before navigating out of the current tab, a prompt will pop up asking if you would like to save your changes.

There are unsaved changes. Do you want to save them?

Save Discard Cancel

Click "Save" to navigate out of the current tab and save your changes. Click "Discard" to continue navigating out of the tab without saving your changes. Click "Cancel" or the x at the top of the prompt to remain in the current tab without saving your changes.

Courses

New Courses

➤ To create a new course proposal for a course that has not previously been offered, click 'Create Proposal' (1).

Create Proposal

This page allows you to initiate a draft proposal.

Once completed, the proposal can be submitted (or launched) for review. While under review, changes to a proposal are only allowed when requested by a reviewer.

To create a proposal, follow the steps below.

A screenshot of the 'Proposal Type' selection interface. On the left, there is a vertical list of three steps: '1. Select Proposal Type' (highlighted in blue), '2. Complete Proposal Requirements', and '3. Review and Submit'. The main area shows a 'Proposal Type' dropdown menu with a search bar (containing a red '2' callout) and a list of options: 'Courses', 'Course Deletion', 'Course Modification', and 'New Course' (highlighted in blue with a red '1' callout). At the bottom right, there are three buttons: 'Previous', 'Next' (with a red '3' callout), and 'Create Proposal'.

➤ Select a New Course proposal type from the Proposal Type dropdown menu (1). You can also type keywords in the textbox (2) to narrow your search options. After you have selected a proposal type, click 'Next' (3).

Cloning

What is Cloning?

Cloning is an optional META feature that must be requested by Admin users.

The process of cloning is actually the extraction of data from an existing proposal (either a course or program proposal) into a new proposal. Cloning is different than simply copying an entity - copying an entity simply creates another instance of that entity, while cloning creates an entirely new entity.

Cloning a Proposal

Log in as you normally would. On the META homepage, click 'Create Proposal' (1).

Create Proposal

This page allows you to initiate a draft proposal.

Once completed, the proposal can be submitted (or launched) for review. While under review, changes to a proposal are only allowed when requested by a reviewer.

To create a proposal, follow the steps below.

On the Create Proposal page, select the proposal type you wish to create from the dropdown (1). You can also type keywords in the textbox (2) to narrow your search options. After you have selected a proposal type, click 'Next' (3).

Generally, you will choose a variant of a New proposal (course or program). The exact type of proposal you choose will be affected by how your institution's course types are configured.

Packages

A package bundles Course and Program draft proposals into a single proposal so that all items work through the approval process together and activate at the same time.

You may have multiple package proposal types that follow different workflows, such as one for new curriculum, one for modifying curriculum, and one for deactivating curriculum, or proposal types for different combinations of curriculum - e.g. all courses, all programs, or courses and programs.

New Packages

Before creating a Package you will need to make sure that all of the courses/programs that you will be adding to the package are in "draft" status. If you are creating a new course/program, then create those proposals first, before creating the package, and then leave the courses/programs in "draft" without launching them.

➡ To create a new package, click 'Create Proposal'.

Create Proposal

This page allows you to initiate a draft proposal.

Once completed, the proposal can be submitted (or launched) for review. While under review, changes to a proposal are only allowed when requested by a reviewer.

To create a proposal, follow the steps below.

➡ Select a New Package proposal type from the Proposal Type dropdown menu (1). You can also type keywords in the textbox (2) to narrow your search options. After you have selected a proposal type, click 'Next' (3).

Assessments

The Assessment module allows end users to provide and analyze feedback on course and program effectiveness, student success, course and program success, and student services. This module also allows the user to determine assessment types, set dates of previous and next assessments, staff participation levels, and the methods of assessment.

Both **Assessment** and **Program Review** proposals will include the **All Fields** report. Typically, this report is useful for gaining a quick overview of the proposal, as well as being able to check specific details at a glance.

! NOTE: Assessments are customizable, and assessment names and types vary from institution to institution. Your institution may have somewhat different assessment names and types than what is shown in the examples here, but the basic concepts are the same.

Definition of Terms

SLO: Student Learning Outcome. This term applies to the learning outcomes in a course.

PLO: Program Learning Outcome. This term applies to the learning outcomes in a program.

ILO: Institutional Learning Outcome. This term applies to the learning outcomes of an institution as a whole.

OLO: Organizational Level Outcome. These outcomes are directly tied to institutional hierarchy, so these might be related to Division, Department, Program (School of Engineering or School of Nursing for example, not to be confused with PLOs), or non-instructional units.

GELO: General Education Level Outcome. These outcomes are specific to general education.

Aggregate: Aggregates are combinations of individual assessments - either single assessments or other aggregates.

Who Can Access Assessments

The assessment feature uses origination rights, so any user who has origination rights for a department will be able to create an assessment proposal for that department.

Admins can create assessment proposals for all departments.

In a single institution installation, a user will be able to **see**, but not **edit** assessment proposals originated by other users in their institution.

In a district (i.e., multiple institution installation), a user will be able to see any proposals originated by other users in all institutions they have been given user rights to in a district installation, by using the **Curriculum** dropdown menu.

Creating and Viewing Curriculum - continued

Assessments - continued

What Aspects of Course and Program Proposals Affect Assessments

Outcomes of all types can be pulled into assessments. Outcome mapping affects whether or not we can do certain types of assessments.

What Aspects of the Assessment Feature Affect META

Assessments do not directly affect META other than situations in which assessments could be the driving force behind revision proposals. META does not pull data directly from assessment proposals. Assessments always pull from courses, programs, and other assessments.

Types of Assessments

Individual Instructor SLO Assessment

This assessment is for each instructor of a course to assess the sections they taught for each of the outcomes. This requires a separate proposal for each outcome.

Departmental Aggregate of Individual Instructor SLO Assessment

This assessment is for aggregating all of the assessments that individual instructors have done for a given course Student Learning Outcome.

Aggregate of All SLOs in a Course

The purpose of this assessment is to pull all of the departmental SLO assessments for SLOs in a given course in order to evaluate the course outcomes as a whole.

Aggregate of All SLOs Mapped to an ILO

This requires ILO/SLO mapping on course forms. This assessment allows a school to assess whether the courses are supporting their institutional outcomes effectively.

Aggregate of All SLOs Mapped to an Individual PLO

This requires PLO/SLO mappings on course forms. This assessment allows a department to determine how well the courses in a program are supporting the program's desired outcome.

Aggregate of All PLOs in a Program

This assessment allows a department to evaluate a program as a whole in terms of aggregation of all SLOs -> PLOs for all PLOs in the program.

Aggregate of All PLOs Mapped to an ILO

This requires ILO/PLO mapping on program forms. This assessment allows a school to assess whether the programs are actually supporting their institutional outcomes effectively.

Creating and Viewing Curriculum - continued

Types of Assessments - continued

Non-Instructional Unit Outcome

These assessments can apply to Academic Departments, Student Services, or Admin Units, and are usually annual assessments.

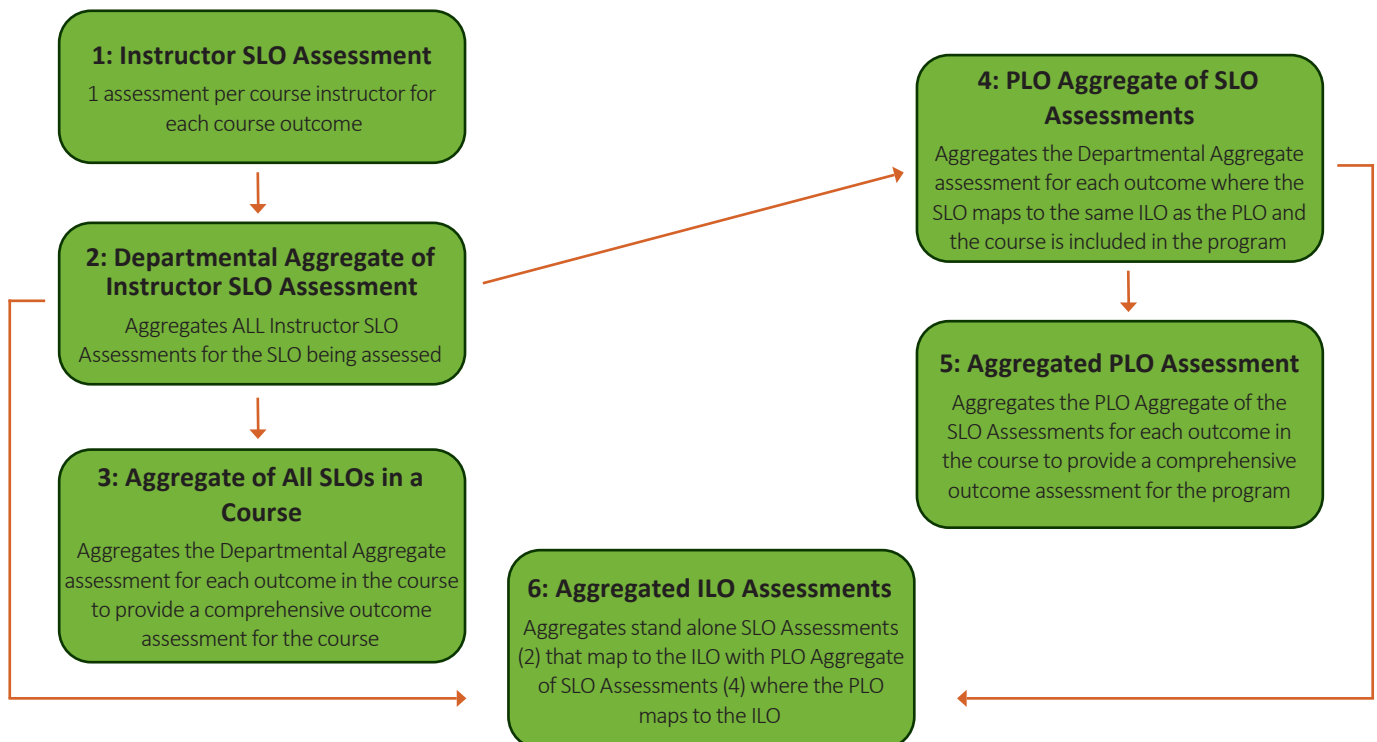

- Academic Department - assessments could include any non-instructional outcomes a department may have (for instance, a psychology department might offer student counseling), or they could assess research being done in a department.
- Student Services - outcomes for these assessments could include the library, financial aid office, campus security, etc.
- Admin Units - these could include Building and Grounds Maintenance, Economic Workforce Development, Center for Science Excellence, etc.

SLO, PLO, and ILO Mappings

Described below are two methods to implement the SLO, PLO, and ILO mappings. (NOTE: since assessments are highly customizable, many institutions have somewhat different mapping configurations. Example 1 is a more common configuration, while Example 2 is a less common but possible configuration.)

Example 1:

- SLOs map to PLOs on the Program Outcome tab.
- PLOs map to ILOs on the Program Outcome tab.
- SLOs map to ILOs on the Course Outcome tab, but only if the course is a "stand alone" course (meaning that it is not part of any program). There is a checkbox on the Main tab of the course that is labeled "This is a stand alone course." If the box is not checked, the ILO map on the Course Outcome tab should be hidden to prevent ILO mapping.

Creating and Viewing Curriculum - continued

Types of Assessments - continued

SLO, PLO, and ILO Mappings - continued

1. Individual Instructor Assessment of an Individual SLO
2. Aggregated Assessment of an Individual SLO:
 - a. Pulls in assessments from item 1 that are all assessing the same SLO.
3. Aggregated Assessment of All SLOs in a Course:
 - a. Pulls in aggregated assessments from item 2 for all SLOs in the selected course.
4. PLO Aggregate of SLO Assessments:
 - a. Pulls in aggregated assessments from item 2 that:
 - i. Are part of a course that is included in the program, and:
 - ii. Are mapped to the same ILO that the program outcome is mapped to.
5. Aggregated PLO Assessment:
 - a. Pulls in aggregated assessments from item 4 for all PLOs in a program.
6. Aggregated ILO Assessment:
 - a. Pulls in assessments from item 4 for all PLOs that map to the ILO.
 - b. Pulls in assessments from item 2 that are part of a stand alone course where the SLO is mapped to the ILO.

See next page for Example 2.

CRN Assessment

CRN assessments are a way for instructors to gather and view data on overall student progress toward a specific Student Learning Outcome in a course during a particular semester. CRN assessments also include areas for instructors to discuss their assessment methods and criteria, compare current student data from the course with past data (if it exists), reflect on the effectiveness of a course, and discuss what (if any) improvements need to be made and/or will be made to the course in future semesters.

See pp. 57-58 for more information on how to correctly fill out a CRN assessment in order to populate student data.

Creating Assessments

Creating an assessment proposal (individual or aggregate) follows the same process as any other proposal.

➡ To create a new assessment, click 'Create Proposal' (1).

Create Proposal

This page allows you to initiate a draft proposal.

Once completed, the proposal can be submitted (or launched) for review. While under review, changes to a proposal are only allowed when requested by a reviewer.

To create a proposal, follow the steps below.

1. Select Proposal Type

2. Complete Proposal Requirements

3. Review and Submit

➡ Select an assessment proposal type from the Proposal Type dropdown menu (1). You can also type keywords in the textbox (2) to narrow your search options. After you have selected a proposal type, click 'Next' (3).

Creating and Viewing Curriculum - continued

Creating Assessments - continued

- 1. Select Proposal Type

To delete the proposal before launching, click 'Delete Draft' (2).

Creating and Viewing Curriculum - continued

Creating Assessments - continued

Items of Note for Assessments

If you are assessing a previous Academic Year's course, you will need to assess the previous version of the course if it has since been updated.

Items of Note for Aggregate Assessments

- An aggregate assessment is a grouping of assessments. These participating assessments may be single assessments, or aggregate assessments themselves. This means you may have aggregates of aggregates.
- Results of the individual assessments are aggregated into the overall average.
- In a Departmental Aggregate of Individual Instructor SLO assessment, you must choose an outcome. Only assessments of that outcome will be available for inclusion. If you chose the current version of a course and assessments have been run on the previous version of the course, nothing will show in the individual assessments to include in an aggregate.
- Even in the case of a course being modified, and all SLOs remaining the same as in the previous version, the SLOs are considered distinct from the previous version. For example, if a course is modified, we can designate the original course as "Course A" and the revised course as "Course B". Even if an outcome - let's say "Outcome 1" - is identical in both versions, the outcome in each version of the course is considered distinct from the other. Outcome 1 of an individual instructor assessment of Course A will not be available if the aggregate chooses Course B > Outcome 1.
- In order for an SLO assessment to be included in a PLO assessment, they must be mapped to a program outcome (use the **Program Outcomes** tab).
- To show in the list, check the **Include Course in SLO** map option when adding the course to a course block.
- For an Aggregate of PLOs to ILO assessment, choose **Institutional Outcome**. This will pull in any program outcomes assigned to that outcome. This will be an aggregate of all assessments of PLOs that are mapped to the ILO selected on the form.

CRN Assessments: How-To

To create a CRN assessment, choose a CRN assessment type from the Proposal Type dropdown and go through the same process as you would for any other proposal.

1. Select Proposal Type
2. Complete Proposal Requirements
3. Review and Submit

The screenshot shows a web interface for selecting a proposal type. At the top, there is a dropdown menu labeled "Select a proposal type" with a small upward-pointing triangle on the right. Below the dropdown, a list of assessment types is displayed under the heading "Assessments". The list includes: "Academic and Student Service Area SSO or SLO Assessment", "Admin Unit Outcome Assessment", "Certificate or Major PSLO Assessment", "Counseling SLO or SSO Assessment", and "CRN-level SLO Assessment". The "CRN-level SLO Assessment" option is highlighted with a blue background, indicating it is the selected choice.

Creating and Viewing Curriculum - continued

Creating Assessments - continued

CRN Assessments: How-To - continued

Once you are in the proposal, you will need to fill out relevant information for the assessment. Configurations vary slightly by institution, but in general, instructors must choose themselves as the originator of the proposal, and choose a subject, course, version of the course, the outcome being assessed for that course, course registration number, semester, and year. (See below for examples.)

If the correct information is not selected (for example, an instructor is paired with a course they did not teach or assess), some dropdowns (such as "Year") and the list of students will not populate with any values to select, and the instructor will be unable to complete the proposal.

CRN Information

Last updated by CurriQunet SupportAdmin on 10/26/2021 at 10:09 AM
[Questions? Find answers in curriQunet User Manual.](#)

CRN * 30266 Spring

Year * 2020

If the correct information is selected, a list of students that attended the selected course during the selected semester and year will populate. Options vary slightly by institution, but in general, students can be marked on the assessment as "meeting SLO", "approaching/developing SLO", "no evidence of SLO", "not assessed", or "no longer enrolled."

Please select an assessment level for each student below. If no students are listed, no student data has been loaded with you as instructor for the selected CRN and year.

CRN Student Data

<input checked="" type="checkbox"/> A ██████, Melissa - W7 ██████
Assessment Level * Meets SLO
<input checked="" type="checkbox"/> B ██████, Jenna - W10 ██████
Assessment Level * Developing SLO

Creating and Viewing Curriculum - continued

Creating Assessments - continued

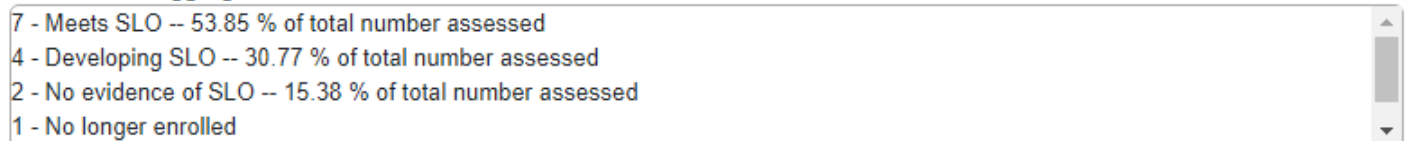

CRN Assessments: How-To - continued

As soon as one or more students in the course are marked with one of these options, an aggregate query text will populate with data showing the number of students in each category and the percentage of students in each category where the SLO was assessed.

See below for an example. First the number of students in each category is shown (in this example, 7 students were marked as having met the SLO), then the percentage of total students assessed in each category (in this example, 53.85% of students who were assessed were marked as having met the SLO). The same goes for "Developing SLO" and "No evidence of SLO."

While there is a number of students noted next to "No longer enrolled" (in this example, just 1 student), there is no percentage included because students who are no longer enrolled have not been assessed. This is also the case for "Not assessed" (not shown in the example below).

Assessment Aggregate

7	- Meets SLO -- 53.85 % of total number assessed
4	- Developing SLO -- 30.77 % of total number assessed
2	- No evidence of SLO -- 15.38 % of total number assessed
1	- No longer enrolled

Creating and Viewing Curriculum - continued

Program Reviews

Program reviews are performed periodically by certain institutions; they are intended to (among other things) keep track of current and future budget needs/resources for a program, attendance and enrollment numbers for the program, and whether expectations and outcomes are being met for that program.

Program reviews can be performed annually, semi-annually, every semester, every 2 years, etc. Much like assessments, program reviews are highly customizable, and the names and types of program reviews vary largely from institution to institution. Permissions to create, view, and/or edit program reviews may vary as well.

Your institution may have very different program review names and types than what is shown in the following examples, but the basic concept (a school administration gathering data about a particular program in order to decide whether the program is performing up to expectations and is monetarily feasible to continue to provide) is essentially the same across all program reviews.

The screenshot shows the curriQūnet interface. At the top left is the logo. Below it, there are tabs for 'Curriculum' and 'Approvals'. A dropdown menu is open under 'Curriculum', listing 'Course', 'Program', 'Assessment', and 'Program Review' (which is highlighted with an orange border). To the right, there is a 'Create Proposal' button. Below the navigation, there are filters for 'College', 'Subject', 'Proposal Type', and 'Status'. A search bar with 'Keyword Search:' and a search icon is present. Below the filters is a table with columns: Institution, Subject, Course, Type, Status, and Reports. A message below the table reads: 'You have no current proposals. Check your filters above. To search other curriculum, use the filters above and click search. If you would like to create a new proposal, click on the "Create Proposal" at the top of the screen.'

➤ *To access existing program reviews, choose 'Program Review' from the Curriculum dropdown.*

The screenshot shows the 'Program Reviews' section of the curriQūnet interface. It includes a 'My Proposals' checkbox, filters for 'Organization', 'Proposal Type', and 'Status', and a search bar. Below these is a table with columns: Department, Title, Type, Status, and Reports. The table contains six rows of data:

Department	Title	Type	Status	Reports
▶ Ethnic Studies	Fall 2015	Instructional Comprehensive Program Review	In Review	
▶ Ethnic Studies	Fall 2015	Instructional Comprehensive Program Review	Draft	
▶ Ethnic Studies	Fall 2015	Instructional Comprehensive Program Review	Draft	
▶ Accounting	E██████, Robert	Instructional Comprehensive Program Review	Draft	
▶ Accounting	F██████, Fahmida	Instructional Comprehensive Program Review	Draft	
▶ Accounting	Accounting Program Review	Instructional Comprehensive Program Review	Draft	

➤ *Click on a program review to view or edit it. If necessary, narrow your search by using the Search filters (explained on pp. 14-20).*

Basic Course Information & Co-Contributor(s)

Co-Contributor(s)

Course Discipline EMS

Course Number 170

Course Title Paramedic-Theory

Short Title Paramedic-Theory

First Semester Intended to Offer 2010 Fall Semester

Catalog Description

This course is the first of a two-semester long program that provides the Paramedic student the didactic information and skills required to meet the state of California requirements for paramedic training. The course meets accreditation requirements of the Committee on Accreditation of Educational Programs for the EMS Professions (CoAEMSP). The course follows U.S. Department of Transportation Paramedic National Standard Curriculum. Upon successful completion, of EMS 170 and EMS 171, the student will be eligible to take the National Registry Exam required for licensure as an Paramedic in the state of California.

Course Reports - continued

Comparison Report

The Comparison report is only for modification and deactivation proposals. Like the All Fields report, this report includes every field on the proposal, with changes made to this version of the proposal highlighted, as compared to the previous version.

! NOTE: It is highly recommended that when running a comparison report, you choose to compare **an older version of the course than the one you are currently viewing**. In the example below, this comparison report would be generated when viewing the newer, active version of the course from 2017 and comparing it with a historical version from 2011. The older version is on the left with deleted information highlighted in pink, while the new version is on the right with changes/new information highlighted in green. This is how a comparison report is meant to be seen.

If, however, you were to do this in reverse - for example, you were viewing the historical version of the course and you ran a comparison report with the newer version - the comparisons would be flipped, with the newer version on the left with changes highlighted in pink and the older version on the right with deleted information highlighted in green. That could get a bit confusing, so even though it is possible to run comparison reports in that way, it is not recommended!

Program Reports

Standard program reports include the Program Summary report, All Fields report, and Comparison report; your institution may have additional, different, or customized reports.

Program Summary

The Program Summary report shows an overall summary of the program and usually includes a description of the program, any program learning outcomes associated with the program, and required courses for the program.

Program Summary

2D Animation and Games

Description

The certificate in 2D Animation and Games prepares the student for entry-level positions in the fast-growing gaming and animation industry. The certificate develops within the student a dynamic, multidisciplinary skill set which fosters growth in both the visual arts and coding for games. The new media labs housed within the Multimedia Studies program are equipped with state-of-the-art computers, software, and monitors which allow the student to experience the tools that professional animators and game designers are using today.

Program Learning Outcomes

Upon successful completion of the program, the student will be able to:

1. **Edit and create graphics for animation and gaming applications.**
2. **Create 2D animations using industry standard software.**
3. **Discuss the principles of animation and game design.**
4. **Create game assets and control them with Actionscript.**

Degree Requirements

Required Courses for the Certificate		Units: 9.00
None		
<i>Term 1</i>		
MSP 96	Introduction to Computer Graphics	3.00
MSP 12	Two-Dimensional Animation	3.00
MSP 42	Digital Game Design and Production	3.00

Notes: The Certificate in 2D Animation and Games prepares the student for entry-level positions in the gaming and animation industry.

Total: 9.00

Comparison Report

Just as with course proposals, a Comparison Report for programs will show all fields and information in a modification or deactivation proposal, comparing changes between proposal versions by highlighting the changes in green or pink. **(See important note about Comparison Reports on p. 66.)**

 Comparison	
Accounting – Major #2010 - Certificate of Achievement (Historical - Implemented 07-08-2021)	Accounting – Major #2010 - Certificate of Achievement (Active - Implemented 07-22-2021)

Reports - continued

Package Reports

There are no specific package reports. However, by clicking the course or program title that has been selected, you can view the reports in the proposal from the curriculum item (course or program) itself.

Assessment/Program Review Reports

The **All Fields** report is the only report for Assessment and Program Review proposals. As with course and program proposals (see pages 65 and 69), the All Fields report for Assessments and Program Reviews include every field on the proposal.

Launching Curriculum into the Approval Workflow

Once you have entered all the necessary data and completed all required fields in a proposal, clicking the **Launch** button at the upper right of the proposal screen will submit the proposal to the approval process. The proposal will then change from "Draft" status to "In Review" status.

META will send an email notifying the person(s) assigned to the first level of the workflow that there is a proposal waiting for their review.

Proposal Functions and Features

If you are familiar with web-based applications, you will find currIQūnet META easy to use. The flexible nature of META means that there are numerous combinations of field types and functionalities to collect data in the format required.

This portion of the user guide will highlight specific field types and provide instruction on META-specific features, and provides some step-by-step instruction for their use, but it does **not** include detailed instructions for filling out specific proposals from start to finish. Your institution may provide instructional materials that dive deeper into the specific proposal types you will encounter, or may include more specific instructions about the types of information they require.

Navigating Proposals

Move between the sections of the proposal by using the **dark gray tabs** on the left of the page. Any required fields throughout the course proposal will be marked with an asterisk (*) and highlighted light orange or blue. Sections with required fields also have an orange or blue box showing your progress. **(For more information and screenshots, see p. 21 - "Status, Launch Requirements, Tabs, and Badges".)**

! NOTE: Some clients will have an informational landing page that includes links to resources and contact information for local admins. Some have extensive instructional text on that page. Your cover page may or may not, depending on your institution.

Saving

When changes are made, it is important to click the Save button to commit your changes. In case information previously entered needs to be updated or corrected, DO NOT use your browser's back button. Instead, navigate back to the tab containing the information. Select the Cancel button to undo your changes. **(For more information and screenshots, see p. 22 - "Saving Tabs".)**

Textbox/Text Area

Group Title

 Put your cursor into the textbox and enter information directly into the text area. Make sure to save the tab once you have finished entering in the applicable information.

The screenshot shows a proposal form on the left and a 'Settings' dialog box on the right. The form has a sidebar with categories like 'Co-Contributors', 'Units/Hours', 'Objectives', 'Requisites & Content Review', 'Student Learning Outcomes', 'Methods of Instruction', 'Assignments', 'Methods of Evaluation', 'Text & Course Materials', 'Lecture Content', 'Lab Content', 'General Ed', 'Distance Education Addendum', 'Library', and 'Attached Files'. The 'Methods' section is expanded, showing checked options for 'Demonstration/Return Demonstration', 'Lecture/Discussion', and 'Laboratory', and unchecked options for 'Media/Audiovisual' and 'Small group work'. There is also an 'Other (specify)' checkbox. The 'Other Method' section contains a text area with 'Individualized instruction' and 'Field trips to visit various construction sites'. A toolbar in the bottom right of this text area contains icons for a power button, a gear, a cursor, and a checkmark. The 'Settings' dialog box is open, showing options for 'Go to Dictionary', 'Language' (set to 'American English'), 'General' settings (including 'Correct spelling automatically' which is turned on), and 'Ignore options' (including 'Ignore all-caps words', 'Ignore domain names', 'Ignore words with mixed case', and 'Ignore words with numbers'). The 'About' section shows a logo and version information: 'Version: 3.4.4570' and '© 2021 WebSpellChecker LLC. All Rights Reserved.'

 If you see an orange checkmark in the corner of a textbox/text area, mousing over the checkmark and clicking on the gear icon will show you spellcheck and language settings.

Date Fields

Objectives		Codes/Dates
Requisites & Content Review		Entry of Special Dates
Student Learning Outcomes		Board of Trustees <input type="text" value="6/5/2021"/> 
		Effective <input type="text" value="1/7/2021"/> 

  To select a date, either click on the calendar icon or type in the date using the format M/D/YYYY.

June 2021						
Su	Mo	Tu	We	Th	Fr	Sa
30	31	1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30	1	2	3
4	5	6	7	8	9	10

 When you click the calendar icon, a calendar will appear. You can use the left and right arrows next to the month's name to browse for another month. When you are in the correct month and year, select the correct day. The calendar will disappear and your selected date will populate in the textbox.

Attach Files

In the Attach(ed) Files section, you may attach files for additional documentation or support of your proposal.

Attached Files

Press Select to browse for files. To attach selected files to this record, press Upload files.

Attachments

There are no attachments to display. Press Select to browse for files to attach to this record.

 Use the 'Select' button to find files. Navigate to where your files are stored and select them.

8 - connections impact report.png 4 5 6

Once the file is uploaded, it will appear in the 'Attachments' list. To change the name of the uploaded file, click the textbox and type in the desired name (4). To download the file, click 'View File' (5). To remove the uploaded file, click the 'x' circle on the far right (6).

Checkbox

Checkboxes are used when selecting a single option for an item.

- This course will be included in an existing program.

Proposal Functions and Features - continued

Checklist

A checkbox is a list of items where you may select multiple items. **Methods of Instruction** is an example of a checklist you may commonly encounter.

Methods of Instruction

Please check all that apply. If you are proposing this course for Distance Education, be sure to check the Distance Education box.

Instruction Type

List all that apply

- Field Experience
- Activity
- Lecture
- Lab
- Observation and Demonstration

Repeater Checklist

A repeater is a special kind of checklist. When items in the checklist are selected, additional fields appear requesting information about that selection.

A common use for this function is course general education, where the user indicates which general education areas this new course will meet. Each selection will trigger a hidden field to appear, requesting a justification for this classification.

In the example below, the first checkbox triggers three additional checkboxes to appear when it is checked, and a comments box, a dropdown, and a date picker appear for each of those items when checked.

 Scroll down to find the item you are looking for, or type the first few letters of the item you are looking for in the search box (1) to filter and shorten the available list.

Click the checkbox next to each applicable item. Select as many items as required. If you check the 'Show selected' box (2), you will only see the items you have selected. Click 'Clear All' (3) to start over with your selections.

Proposal Functions and Features - continued

Grids aka Textbooks/Course Materials

The grid feature is usually used to add learning materials to a course - textbooks, manuals, software, etc.

Texts, Readings, and Materials

Transfer institutions require current publication date(s) within 5 years of outline addition/update. For textbooks published longer than 5 years ago, please include a justification. (Ex: "Our music faculty continually examine new texts as they become available. It is our collective opinion that the Mastering Music Series is the most appropriate for our beginning piano classes. Its pedagogy is up to date.")

For texts, please enter Author: Last name, First name.

Course Requisites

Course requisites in META use an ordered list format. List items can be (in some cases) put into a hierarchy, and can be dragged/dropped into a different order or reordered with up and down arrows after being added.

curriQunet META's ordered list format is being upgraded and improved for many schools, mainly for program course blocks. Most institutions using META are still using the old ordered list format for course requisites, so this portion of the guide will be using the old ordered list for examples.

The configuration of ordered lists, the number of tabs required to fill out course requisites, the names and types of tabs, and the options/required fields for individual requisite items may vary according to institution.

Course Requisites - continued

The **Condition** dropdown selector is only used if an "or" situation or a "nesting" situation applies, otherwise it is implied that an "and" statement exists between entries. The Condition dropdown menu allows you to specify if this course must be taken as well ("**and**"), or instead of ("**or**") the next requirement.

A screenshot of a dropdown menu labeled "Condition". The menu is open, showing three options: "and", "and", and "or". The first "and" option is highlighted in blue. Below the dropdown, the text "and title on Report (Admin-Only)" is partially visible.

As you enter and save each requisite entry, you will see a screen similar to the one below.

A screenshot of the "Requisites" interface. At the top, there is a header bar with "Requisites" on the left, a "Show Details" button with a checkmark, and an "Add Item" button with a plus sign. Below the header, there are two blue bars representing requisites. The first bar is labeled "Prerequisite" and contains the following text: "Type of Pre/Corequisite: Intended to establish communication or computational skills", "Subject: ACCTG - Accounting", "Requisite Course: ACCTG 4A - Financial Accounting (Active)", "Current Course Objective(s): This section does not contain any data.", and "Requisite Course Objective(s): This section does not contain any data.". A red circle with the number "1" is placed over the blue bar. The second bar is labeled "Corequisite" and contains the following text: "Type of Pre/Corequisite: Authorized or required by Statute or Regulation", "Subject: ACCTG - Accounting", "Requisite Course: ACCTG 4B - Managerial Accounting (Active)", "Condition: and", "Current Course Objective(s): This section does not contain any data.", and "Requisite Course Objective(s): This section does not contain any data.". A red circle with the number "2" is placed over the blue bar, and a red circle with the number "3" is placed over the right side of the blue bar, which contains up and down arrows and a red 'X' icon.

➤ To edit a course requisite, click the blue bar containing the requisite (1). You will be taken back to the detail page where you are able to make changes. To re-order requisites, use the up and down arrows on the right of the blue bar (2). To delete a requisite, click the red 'Delete' icon on the far right of the blue bar (3).

Proposal Functions and Features - continued

Student Learning Outcomes

The Student Learning Outcomes tab often uses an ordered list feature. In this particular example, the new ordered list is used rather than the old ordered list.

Outcome 1| 2 ✓

Assessment

In-person presentations and exams 4 ✓

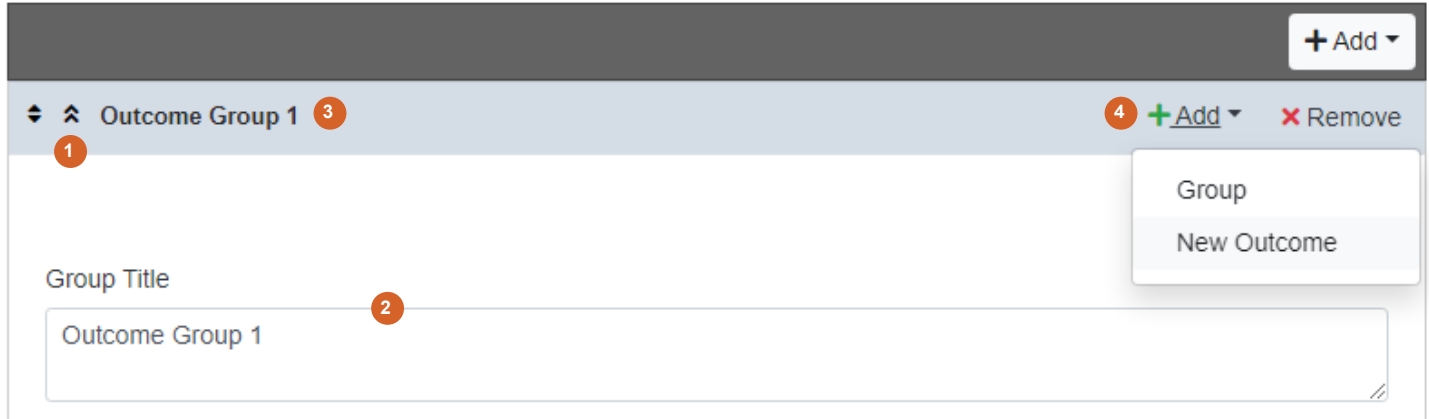

➤ If you selected 'New Outcome', the item will initially be blank. Click the arrows on the left to expand the item (1) and add an outcome to the 'SLO Text' textbox (2) which will populate as the item title (3). If applicable, add an assessment type to the 'Assessment' textbox. (4). Click the arrows again to collapse the item. To remove the item, click 'Remove' at the far right of the item. You can edit the item at any time after adding it by expanding the collapsed item in the list.

Proposal Functions and Features - continued

Student Learning Outcomes - continued

Student Learning Outcomes

☰ Student Learning Outcomes

➤ If you selected 'Group', the item will initially be blank. Click the arrows on the left to expand the item (1) and give the group a name in the 'Group Title' textbox (2), which will populate as the group item title (3). To add an outcome or a sub-group, click the '+Add' button on the top right of the group item and select 'Group' or 'New Outcome' (4).

The process for adding a new outcome or sub-group inside of a group is the same as adding an outcome or group outside of a group. Below is an example of what a group looks like when it has outcomes and another group with outcomes inside of it.

(Note that once a group has at least one item inside of it, the 'Remove' button disappears from the group and is added instead to the items within the group. This goes for sub-groups as well. In order to remove a group, all items within the group must be removed first. Then the 'Remove' button will appear on the group again.)

Student Learning Outcomes

☰ Student Learning Outcomes

Proposal Functions and Features - continued

Student Learning Outcomes - continued

Some institutions have the option to map course SLOs directly to Individual Learning Outcomes (ILOs). This is normally only done for standalone courses or for institutions that do not map their SLOs to their Program Learning Outcomes (PLOs) directly.

This SLO maps to the following Institutional Learning Outcomes (ILOs), please check all that apply:

Think Critically

Locate relevant information resources and use them effectively and ethically

Interpret, analyze, synthesize, and evaluate ideas and information

Apply knowledge and skills to a variety of situations

Communicate Competently

Listen respectfully and actively to diverse ideas and perspectives

Communicate clearly, appropriately, and ethically

Adapt messages to a variety of audiences and purposes both through writing and speaking

Engage Collaboratively

Interact productively and empathetically in different social and cultural contexts

Understand the local and global impacts of individual and collective actions

Engage with your community to enact positive change

Work Effectively

Demonstrate skills, knowledge, and problem solving applicable to one's field of study

Work well with others and foster an inclusive workplace

Develop personal accountability and initiative, and pursue lifelong learning

 *If mapping an SLO to ILOs is an option, users can indicate by checking the appropriate checkboxes as to which ILOs an SLO maps to. Multiple checkboxes can be selected.*

Items inside of the SLO ordered list (either older or newer) can be edited or removed after being added. See p. 81 for how to edit or remove items inside of an old ordered list, and p. 82 for how to edit or remove items inside of a new ordered list. The instructions on p. 81 are specifically for course requisites, but they apply to any ordered list using the old format.

Proposal Functions and Features - continued

Content Review

Content Review gives the user the ability to review how the content or objectives of a requisite affect the course they are working on. Tab names and configurations may vary by institution (some institutions have content review/requisite validation in the same tab as the requisites themselves), but in the below example, content review can be viewed, added, or changed in a separate "Requisite Validation" tab.

ACCT 30 - Accounting Capstone

Content Review

Content Review Type
Objective to Objective

Current Course Objective(s)

- 1. Compare and contrast various program structures, philosophies and curriculum models.
- 2. Identify strategies to ensure equity and respect for children, families, staff and colleagues.
- 3. Summarize systems and methods to support sound fiscal operations in a variety of early care and education settings.
- 4. Demonstrate knowledge of compliance with regulatory systems.
- 5. Assess various methods and tools of evaluation.
- 6. Examine effective policies and procedures for staffing and scheduling.

Requisite Course Objective(s)

- Compare historical and current theoretical frameworks of socialization.
- Compare and contrast diverse family structures, parenting styles, culture, tradition and values and their impact upon children and youth.
- Identify contemporary social issues and their effects on families and children.
- Explain the effects of age, gender, diverse abilities, language and culture, racial identity and ethnicity, socio-economic status and institutions on children and families.
- Define and examine a variety of contemporary issues that influence family functioning.
- Identify appropriate community resources that support children and families including at risk populations.
- Demonstrate knowledge of legal requirements and ethical responsibilities of professionals working with children and families.
- Identify one's own family history and examine how it affects one's relationships with children and families.

Update Cancel

 *To map this course's objectives to a requisite course's objectives, select the Content Review type 'Objective to Objective' from the Content Review Type dropdown. Select the current course objectives and the corresponding requisite course objectives from the checklists that will appear.*

 **NOTE:** Both courses must have objectives saved in order for items to appear in the checklist.

Content review types may vary somewhat between institutions. Your institution may have more, less, or different content review types than what is included in this example.

Other possible content review types for various institutions include Outcome to Outcome, Objective to Content, Content to Content, and so on. The basic concept of mapping the current course's content/objectives/outcomes to that of a requisite course is the same.

Proposal Functions and Features - continued

Course Blocks

Course blocks are ordered lists that hold requirements for a program. They can include lists of courses, non-course requirements, and groups with courses and/or non-course requirements inside of them. Course blocks for most institutions on META use the new ordered list format rather than the old format, and can be created from scratch or (depending on the institution) imported from an existing course block library.

Some institutions have a **two-tab** system when adding courses and other requirements to programs. There is one tab to add required courses in an ordered list, and another tab where those added courses and groups/other requirements are put into the program sequence in another ordered list.

In almost all cases in the two-tab system, courses cannot be added to the second tab without first being added to the first tab. When adding a course in the second tab, the course selection dropdown in the ordered list item(s) will not populate any courses that have not already been added to the first tab.

Some institutions have a **one-tab** system in which courses and other requirements are added to programs in a single tab. When adding a course item to an ordered list, there are dropdowns for subject and course. All available subjects will populate in the subject dropdown, and all available courses for the selected subject will populate in the course dropdown.

Keep in mind that since many META features are customizable, many of the tabs, function names, and the configuration/layouts of some features may be somewhat different for your institution than what is shown in the included examples, but the basic concepts are the same.

Two-Tab System

In the below example from the two-tab system, this institution has a “Program Courses” tab and a “Program Mapper” tab. Course requirements for programs must first be added to the course list in the “Program Courses” tab before being added and sequenced into course blocks in the “Program Mapper” tab.

Exception Identifier

Exception

! NOTE: The same is true of the 'Exception Identifier' and 'Exception' fields in both course and group items. These fields are for making any special notes about the list item. If changes to these fields are made to items in one tab, they will **not** transfer to the other tab and will have to be manually added/changed in each tab.

Proposal Functions and Features - continued

Course Blocks - continued

Two-Tab System: Adding a Group

To add a group to the ordered list, choose 'Group' from the '+Add' dropdown. A blank item will populate. Once expanded, the group will show a textbox for a group name. The group name will populate in the item title once added.

Program Courses

☰ Course List

The screenshot displays a software interface for managing course blocks. At the top right, there is a '+ Add' button with a dropdown arrow. Below this, a list of course blocks is shown. The first block is 'Business and Accounting', which is highlighted with an orange border. To its right, 'Min Units: 0' and 'Max Units: 0' are displayed. Below the course name, there are three toggle switches: 'Exclude' (off), 'Override' (off), and '+ Add' (on), followed by a red 'X Remove' button. The 'Business and Accounting' group is expanded, showing a 'Group Name' field with the text 'Business and Accounting' entered, also highlighted with an orange border. Below this are two empty text input fields for 'Exception Identifier' and 'Exception'. The second course block in the list is 'ACCT 2 - Financial Accounting', with 'Min Units: 4' and 'Max Units: 4' to its right. It has 'Exclude' (off), 'Override' (off), and 'Remove' (red X) buttons.

 *Type a name/designation for the group in the 'Group Name' textbox.*

 **NOTE:** You may wish to group courses in the first tab for the purpose of consistency and easy reference, but while **courses** that are added as list items or as nested items within groups in the first tab will be selectable in the second tab, **groups** and course groupings will not transfer from one tab to another. Any group(s) added or changed in one tab will have to be manually added/changed in the other tab.

Proposal Functions and Features - continued

Course Blocks - continued

Two-Tab System: Adding a Group

You can add courses or sub-groups to a group in the first tab.

Program Courses

☰ Course List

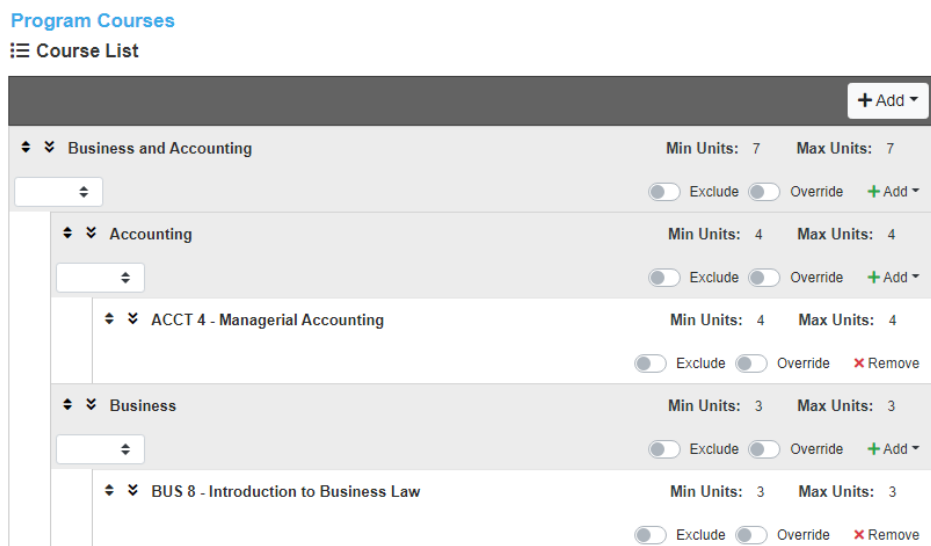

Click the '+Add' button inside the group item and choose 'Course' or 'Group' to add a course or sub-group to the group.

Once you have populated a blank course or sub-group within an existing group, follow the exact same procedure as you would if you were adding the course or group item outside of the group (see previous pages).

Note that when at least one item is added to a group, the 'Remove' button disappears from the group list item and appears on the item(s) inside the group instead. In order to remove a group, all items inside the group must first be removed. The 'Remove' button will then reappear on the group list item.

You can potentially have as many nesting levels within groups as you would like. For example, the main group "Business and Accounting" could have one sub-group inside it called "Accounting" for courses with the ACCT subject and another called "Business" for courses with the BUS subject (see example below). Each of those sub-groups could potentially have another group inside of them as well, and so on. Generally speaking, however, despite the ability to nest multiple levels, the number of nesting levels within groups should ideally be kept to as few as absolutely necessary.

Proposal Functions and Features - continued

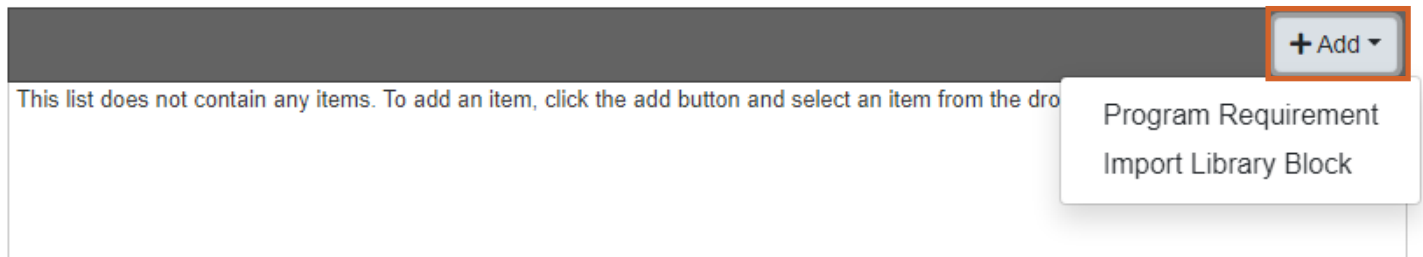

Course Blocks - continued

Two-Tab System: Creating or Importing a Course Block

In the second tab, you will first need to create (or - if your institution has this function - import) at least one course block.

Program Mapper

☰ Course Block

The screenshot shows a dark header bar with a '+ Add' button on the right. Below the header, a message reads: "This list does not contain any items. To add an item, click the add button and select an item from the dropdown menu." A dropdown menu is open, showing two options: "Program Requirement" and "Import Library Block".

➤ Click the '+Add' button. You may choose 'Program Requirement' (to create your own block) or 'Import Library Block' (to import an existing course library block). See p. 95 for importing a library block.

As with other ordered list items, any course block you create by clicking 'Program Requirement' will initially be blank with no information.

Program Mapper

☰ Course Block

The screenshot shows a dark header bar with a '+ Add' button on the right. Below the header, a single course block is visible. On the left side of the block, there are two downward-facing arrows, one of which is highlighted with a red box. To the right of the block, the text "Min Units: 0" and "Max Units: 0" is displayed. Below this, there are three toggle switches: "Exclude" (off), "Override" (off), and "Remove" (with a red 'x' icon).

➤ Click the downward-facing arrows on the left side of the list item to expand it.

Two-Tab System: Creating or Importing a Course Block - continued

In the example below, this course block has several groups, all of which contain relevant courses within them. Some course blocks do not have groups, only a list of courses. Some course blocks include non-course/other requirements as well.

The screenshot shows the 'Program Mapper' interface with a 'Program Courses' section. It features a 'Return' button and a '+ Add' dropdown. The main content is a list of course blocks, each with a group name, a search input, and unit requirements. Each block has 'Exclude', 'Override', and 'Add' options.

Group Name	Min Units	Max Units	Exclude	Override	Add
Administration of Justice	3	3	<input type="checkbox"/>	<input type="checkbox"/>	+ Add
AJ 1 - Criminology	3	3	<input type="checkbox"/>	<input type="checkbox"/>	Remove
Agriculture	3	3	<input checked="" type="checkbox"/>	<input type="checkbox"/>	+ Add
AGS 10 - World Food and Hunger Issues	3	3	<input type="checkbox"/>	<input type="checkbox"/>	Remove
American Sign Language	3	3	<input checked="" type="checkbox"/>	<input type="checkbox"/>	+ Add
ASL 10 - Introduction to American Deaf Culture	3	3	<input type="checkbox"/>	<input type="checkbox"/>	Remove
Anthropology	27	27	<input checked="" type="checkbox"/>	<input type="checkbox"/>	+ Add
ANTH 4 - Cultural Anthropology	3	3	<input type="checkbox"/>	<input type="checkbox"/>	Remove
ANTH 4H - Honors Cultural Anthropology	3	3	<input type="checkbox"/>	<input type="checkbox"/>	Remove

Imported course blocks can be edited as needed, just as you could if you had created the block yourself. You can add courses to the block, add groups to the block, add items to groups, and/or add non-course/other requirements to the block. You can also remove or change any items (group names, courses, etc.) as necessary.

One-Tab System: Adding Items to a Block

☰ Sequence Courses

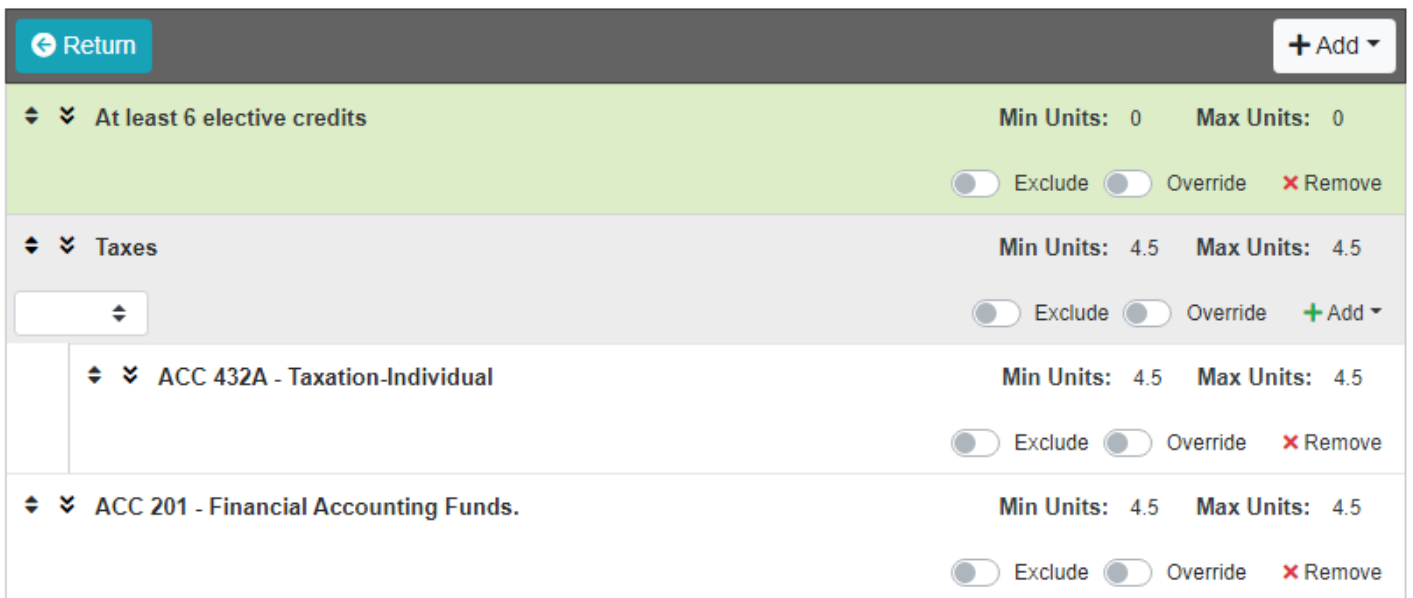

A screenshot of a software interface showing a dark grey header bar. On the left is a blue button with a left arrow and the text "Return". On the right is a grey button with a plus sign and the text "Add". A dropdown menu is open from the "Add" button, listing three options: "Course Requirement", "Grouping", and "Non Course Requirement".

Click the '+Add' button and choose a course, group, or non-course requirement to add. Follow the same procedure to add a course, group (and items within a group), and non-course requirement as on pp. 98-101.

Below is a very simple example of what the ordered list in a one-tab system would look like with a non-course requirement, a group with one nested course item, and a course item added.

☰ Sequence Courses

A screenshot of a software interface showing a list of course blocks. The header bar is dark grey with a blue "Return" button on the left and a grey "Add" button on the right. The list contains four items:

- At least 6 elective credits** (Min Units: 0, Max Units: 0) with "Exclude" and "Override" toggles and a "Remove" button.
- Taxes** (Min Units: 4.5, Max Units: 4.5) with a search dropdown, "Exclude" and "Override" toggles, and an "Add" button.
- ACC 432A - Taxation-Individual** (Min Units: 4.5, Max Units: 4.5) with "Exclude" and "Override" toggles and a "Remove" button.
- ACC 201 - Financial Accounting Funds.** (Min Units: 4.5, Max Units: 4.5) with "Exclude" and "Override" toggles and a "Remove" button.

Proposal Functions and Features - continued

Course Blocks - continued

Dragging and Dropping Items in the Ordered List

Below is an example of an ordered list with one non-course requirement, one course, and two groups that each have one course nested inside of them.

☰ Sequence Courses

← Return + Add ▾

↕ ▾ At least 6 elective credits	Min Units: 0	Max Units: 0	<input type="checkbox"/> Exclude	<input type="checkbox"/> Override	<input type="checkbox"/> Remove
↕ ▾ ACC 201 - Financial Accounting Funds.	Min Units: 4.5	Max Units: 4.5	<input type="checkbox"/> Exclude	<input type="checkbox"/> Override	<input type="checkbox"/> Remove
↕ ▾ Math	Min Units: 4.5	Max Units: 4.5	<input type="checkbox"/> Exclude	<input type="checkbox"/> Override	<input type="checkbox"/> Add ▾
↕ ▾ MTH 418 - Statistical Analysis	Min Units: 4.5	Max Units: 4.5	<input type="checkbox"/> Exclude	<input type="checkbox"/> Override	<input type="checkbox"/> Remove
↕ ▾ Finances and Taxes	Min Units: 4.5	Max Units: 4.5	<input type="checkbox"/> Exclude	<input type="checkbox"/> Override	<input type="checkbox"/> Add ▾
↕ ▾ ACC 432A - Taxation-Individual	Min Units: 4.5	Max Units: 4.5	<input type="checkbox"/> Exclude	<input type="checkbox"/> Override	<input type="checkbox"/> Remove

What if you want to change the order of the items in the list, nest items within groups, or take items out of groups without having to remove and re-add them? That is where the drag-and-drop function comes in.

Proposal Functions and Features - continued

Course Blocks - continued

Dragging and Dropping Items in the Ordered List - continued

The first method is the simplest one - changing the order of items within the ordered list. We'll move the group 'Finances and Taxes' above the ACC 201 course.

☰ Sequence Courses

The screenshot shows a web interface for managing a sequence of courses. At the top, there is a 'Return' button on the left and an 'Add' button on the right. Below this is a list of requirements, each with a drag handle (two triangles) on the left and control buttons on the right. The requirements are:

- At least 6 elective credits**: Min Units: 0, Max Units: 0. Control buttons: Exclude, Override, Remove.
- Finances and Taxes**: Min Units: 4.5, Max Units: 4.5. Control buttons: Exclude, Override, Add. This item is highlighted with a red box around its drag handle.
- ACC 432A - Taxation-Individual**: Min Units: 4.5, Max Units: 4.5. Control buttons: Exclude, Override, Remove.
- ACC 201 - Financial Accounting Funds.**: Min Units: 4.5, Max Units: 4.5. Control buttons: Exclude, Override, Remove.
- Math**: Min Units: 4.5, Max Units: 4.5. Control buttons: Exclude, Override, Add.
- MTH 418 - Statistical Analysis**: Min Units: 4.5, Max Units: 4.5. Control buttons: Exclude, Override, Remove.

➤ *To move an item (non-course requirement, course, or group) from one position in the list to another, click and hold the up-and-down triangles icon on the far left of the list item. Hold your mouse button down as you drag the item into the desired position. Release your mouse button when the item is in the correct spot.*

Proposal Functions and Features - continued

Course Blocks - continued

Dragging and Dropping Items in the Ordered List - continued

The second method involves nesting an existing item inside of an existing group. In this example we'll take a course that is not in a group and put it into a group. We'll move the ACC 201 course into the 'Finances and Taxes' group.

☰ Sequence Courses

The screenshot shows a web interface for managing a sequence of courses. At the top, there is a 'Return' button on the left and a '+ Add' button on the right. Below this, there are several course groups, each with a header bar containing a double-headed arrow icon, a group name, and 'Min Units' and 'Max Units' values. To the right of the header bar are three toggle buttons: 'Exclude', 'Override', and 'Remove' (with a red 'x' icon). A search input field is located below the 'Finances and Taxes' group header. The 'Finances and Taxes' group is expanded, showing a list of courses. The 'ACC 201 - Financial Accounting Funds.' course is highlighted with a red box around its left-side double-headed arrow icon. Below it, the 'ACC 432A - Taxation-Individual' course is listed. Other groups shown include 'At least 6 elective credits' (Min Units: 0, Max Units: 0), 'Math' (Min Units: 4.5, Max Units: 4.5), and 'MTH 418 - Statistical Analysis' (Min Units: 4.5, Max Units: 4.5).

➤ *To move an item into a group, click and hold the up-and-down triangles icon on the far left of the list item. Hold your mouse button down as you drag the item into the desired group, on the same level as any other courses or items in the group.. Release your mouse button when the item is in the correct spot inside the group.*

Proposal Functions and Features - continued

Course Blocks - continued

Dragging and Dropping Items in the Ordered List - continued

Now we'll take a group and nest it inside of another group. We'll move the 'Math' group into the 'Finances and Taxes' group. Note that when a group is moved to another position in the list or nested inside of another group, all items in the group move with it.

The screenshot shows a 'Sequence Courses' interface with a hierarchical list of course groups. The 'Math' group is highlighted with a red box around its left-side collapse/expand icon. The interface includes a 'Return' button, an 'Add' button, and various toggle options like 'Exclude', 'Override', and 'Remove' for each group. The 'Math' group is currently expanded, showing its sub-item 'MTH 418 - Statistical Analysis'.

Group Name	Min Units	Max Units	Exclude	Override	Remove	Add
At least 6 elective credits	0	0	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Finances and Taxes	9	9	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ACC 201 - Financial Accounting Funds.	4.5	4.5	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ACC 432A - Taxation-Individual	4.5	4.5	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Math	4.5	4.5	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
MTH 418 - Statistical Analysis	4.5	4.5	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

➤ To move a group into another group, click and hold the up-and-down triangles icon on the far left of the group item. Hold your mouse button down as you drag the group into the desired group, on the same level as any other courses or items in the group. Release your mouse button when the group item is in the correct spot inside the group.

Proposal Functions and Features - continued

Course Blocks - continued

Dragging and Dropping Items in the Ordered List - continued

Now we'll take an item and put it in a nested group. We'll move the 'At least 6 elective credits' non-course requirement into the 'Math' group, which itself is inside the 'Finances and Taxes' group.

☰ Sequence Courses

The screenshot shows a web interface for editing a sequence of courses. At the top, there is a 'Return' button on the left and a '+ Add' button on the right. Below this, the main content is organized into nested groups. The top-level group is 'Finances and Taxes', which has a 'Min Units: 13.5' and 'Max Units: 13.5'. Inside this group, there are three sub-groups: 'ACC 201 - Financial Accounting Funds.', 'ACC 432A - Taxation-Individual', and 'Math'. The 'Math' group has a 'Min Units: 4.5' and 'Max Units: 4.5'. Within the 'Math' group, there is a requirement 'At least 6 elective credits' highlighted in green. This requirement has 'Min Units: 0' and 'Max Units: 0'. Below the requirement, there is another sub-group 'MTH 418 - Statistical Analysis' with 'Min Units: 4.5' and 'Max Units: 4.5'. Each group and requirement has control buttons: 'Exclude' (toggle), 'Override' (toggle), and 'Remove' (red X). The 'At least 6 elective credits' requirement is being moved into the 'Math' group, as indicated by a dashed green box around it and a red box around its left-side collapse icon.

➤ *To move an item into a nested group, click and hold the up-and-down triangles icon on the far left of the group item. Hold your mouse button down as you drag the item into the desired nested group, on the same level as any other courses or items in the nested group. Release your mouse button when the item is in the correct spot inside the nested group.*

Proposal Functions and Features - continued

Course Blocks - continued

Dragging and Dropping Items in the Ordered List - continued

What if you want to move items out of a group, or out of a nested group and into a main group? The process is exactly the same. Simply drag the item to the level or group in which you want it to be. You can also change the order of items within a group or nested group exactly the same as you would change the order of non-grouped items in the list.

Conditions in the Ordered List

Conditions in the ordered list (for nested items within groups only) can be accessed by clicking on the dropdown inside of a group (see below). Options include AND, OR, and Require.

☰ Sequence Courses

The screenshot shows a user interface for managing course sequences. At the top, there is a dark grey bar with a blue 'Return' button on the left and a white '+ Add' button on the right. Below this, a light grey header bar contains a dropdown arrow, the text 'Finances and Taxes', and 'Min Units: 13.5 Max Units: 13.5'. To the right of the header are three toggle switches: 'Exclude' (off), 'Override' (off), and '+ Add' (with a dropdown arrow). The main content area shows a course entry 'ACC 201 - Financial Accounting Funds.' with 'Min Units: 4.5 Max Units: 4.5'. To the right of this entry are three toggle switches: 'Exclude' (off), 'Override' (off), and 'Remove' (with a red 'x' icon). A dropdown menu is open on the left side of the 'ACC 201' entry, showing three options: 'AND' (highlighted in blue), 'OR', and 'Require'.

On the next page is a detailed breakdown of how each condition affects the items in the groups.

Course Blocks - continued

Conditions in the Ordered List - continued

In the below screenshot, you can see the 'Finances and Taxes' group has an AND condition (1), meaning that all items within it - courses, items in the nested group, and the non-course requirement - must be taken.

The nested 'Math' group has a Require condition with 9 units specified (2), meaning that at least 9 units must be taken ('Items' may also be chosen instead of units). This number of units is added to the parent group 'Finances and Taxes' for a total of 18 units (3).

The 'Business' group has an OR condition (4), meaning that any one of the items within it must be taken, but not all. Because only one item in this group must be taken, and one item has 0 units while one has 4.5, there is a range of total units for the group (5).

The screenshot displays a course proposal system interface with a 'Return' button at the top left and a '+ Add' button at the top right. The main content is organized into several sections:

- Finances and Taxes:** This section is highlighted in light grey. It has a condition of 'AND' (1) and a total of 'Min Units: 18' and 'Max Units: 18' (3). It contains:
 - ACC 201 - Financial Accounting Funds:** Min Units: 4.5, Max Units: 4.5.
 - ACC 432A - Taxation-Individual:** Min Units: 4.5, Max Units: 4.5.
 - Math:** This nested group has a 'Require' condition (2) with '9' units specified. It has 'Min Units: 9' and 'Max Units: 9'. It contains:
 - MTH 418 - Statistical Analysis:** Min Units: 4.5, Max Units: 4.5.
 - MTH 460 - Problem Solving Strategies:** Min Units: 4.5, Max Units: 4.5.
 - At least 6 elective credits:** Min Units: 0, Max Units: 0.
- Business:** This section is highlighted in light green. It has a condition of 'OR' (4) and a total of 'Min Units: 0' and 'Max Units: 4.5' (5). It contains:
 - BUS 100 - Intro to Business:** Min Units: 4.5, Max Units: 4.5.
 - BUS 500C - Macro & Micro Economics:** Min Units: 0, Max Units: 0.

Course Blocks - continued

Sequencing Items

Courses, groups, or other requirements within a block may have a sequencing feature. Configurations may vary somewhat, but the basic concept is that items will show in a specific numbered order in the proposal and on certain reports. In the below example, a sequence order number for the list item in a block can be chosen by clicking on a dropdown and choosing from the available list of numbers.

Course Sequence

Include Course in SLO Map

Sequence Order

1

"Gateway" course?

Choose a sequence order number from the 'Sequence Order' dropdown.

Below is an example of what sequenced courses in a course block would look like on a Program Pathway report.

Program Pathway

1. Program: New Degree/Certificate: Test

SEMESTER-BY-SEMESTER PROGRAM PLAN FOR FULL-TIME STUDENTS

All plans can be modified to fit the needs of part-time students by adding more semesters

Accounting

Units: 8.0

Course	Sequence	Units
ACCTG 10A Intermediate Accounting A	2	3.0
ACCTG 1 Introduction to Financial Accounting	1	5.0

The sequence number is the recommended order in which courses should be taken

Approved for Distance Education

Total: 8.0

Proposal Functions and Features - continued

Rich Text Editor (RTE)

This feature is used in numerous places throughout META. The Rich Text Editor within the META system provides several tools to help you format text entries, and allows you to add hyperlinks and insert images. Other features include find-and-replace, word and character counts, the ability to create tables, special characters, etc. (An in-depth tutorial on formatting tables in the RTE can be found on pp. 121-137).

Copying and pasting an outline straight from Microsoft Word or a similar word-processing program will NOT provide a properly formatted outline. The embedded formatting information that word-processing programs include will cause issues within the editor.

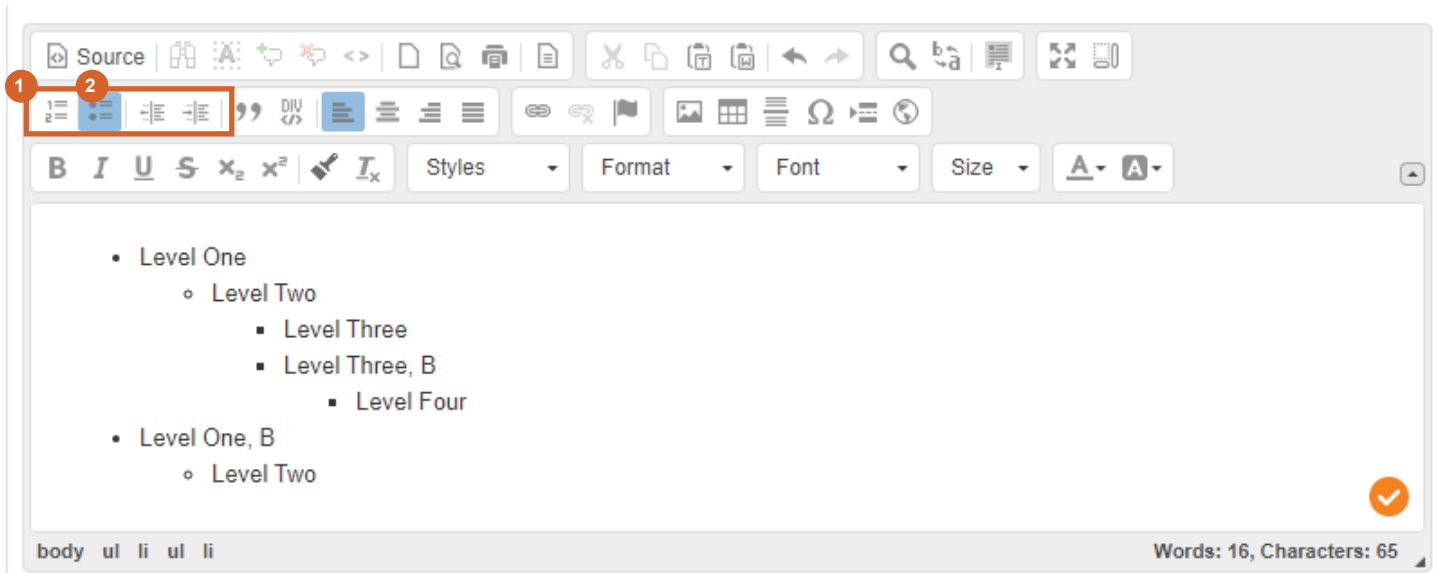

If you are pasting a paragraph of text (as you might for a Course Description) into the RTE, you must paste it as plain text. Type **Ctrl+Shift+V** (in Windows) or right-click on your mouse and select **Paste as Plain Text**. If you do not do this, hidden formatting tags will interfere with the internal tools of the editor and cause problems with reports.

Creating an Outline in the Rich Text Editor

The simplest and best way to produce a properly formatted outline is directly in the Rich Text Editor. You may enter your line headings as you see fit, or use the built-in list tools.

The List Tools buttons create lists. There is a button to create numbered lists (1) and a button to create bulleted lists (2). You can also use the left and right indent buttons (Decrease Indent or Increase Indent) next to the List Tools to create indentation in the lists, or simply use the Tab key on your keyboard.

Below is an example of a bulleted list with several levels of indentation.

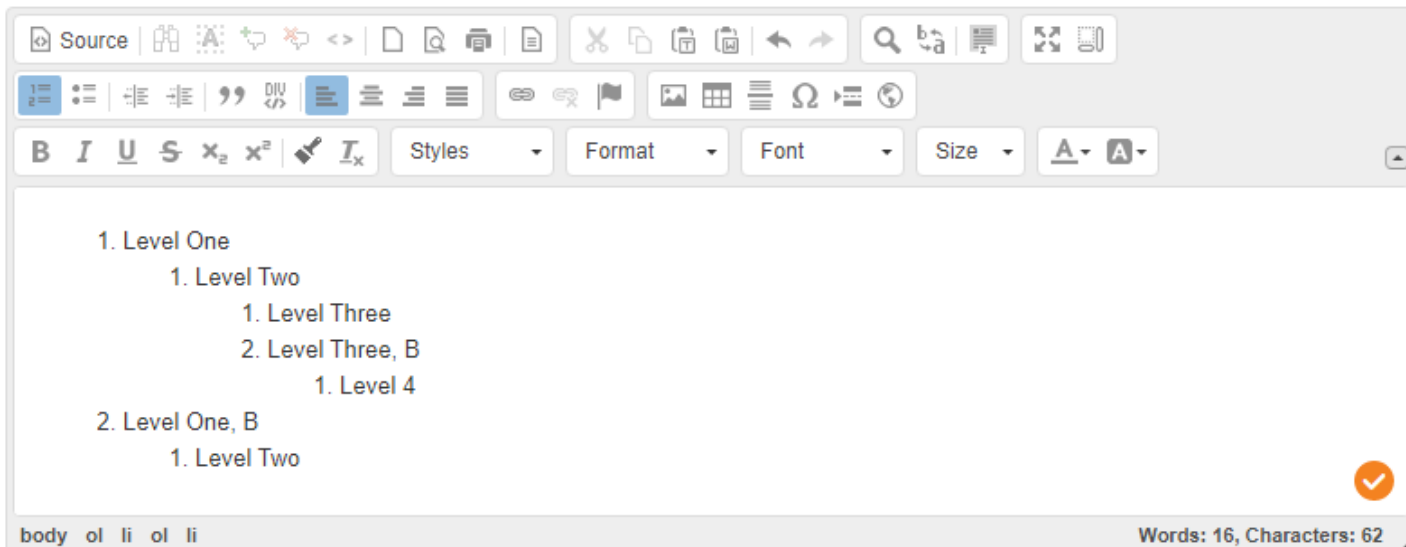

Proposal Functions and Features - continued

Rich Text Editor (RTE) - continued

Creating an Outline in the Rich Text Editor - continued

Below is an example of a numbered list with several levels of indentation.

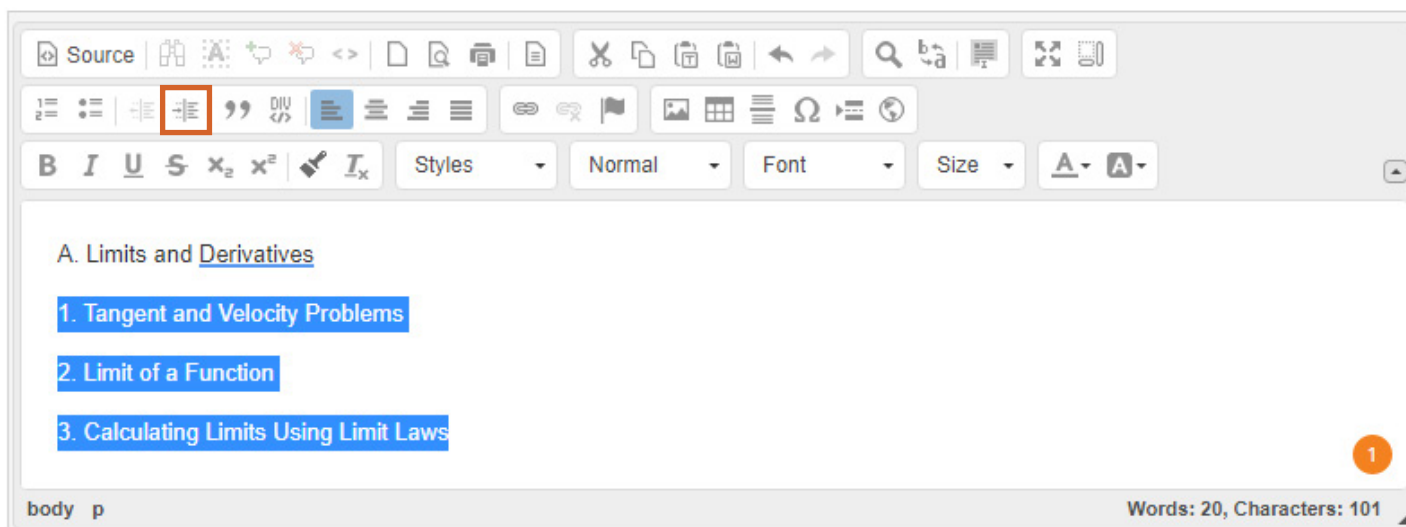

A screenshot of a Rich Text Editor interface. The top toolbar includes icons for source code, undo, redo, and various editing tools. Below the toolbar is a row of text formatting options: Bold (B), Italic (I), Underline (U), Strikethrough (S), subscript (x₂), superscript (x²), and text color (I_x). The main editing area contains a numbered list with four levels of indentation:

- 1. Level One
 - 1. Level Two
 - 1. Level Three
 - 2. Level Three, B
 - 1. Level 4
 - 2. Level One, B
 - 1. Level Two

The status bar at the bottom indicates "body ol li ol li" and "Words: 16, Characters: 62".

If you would prefer to specify your own level designations, you may do so as well, using the indentation tools as necessary.

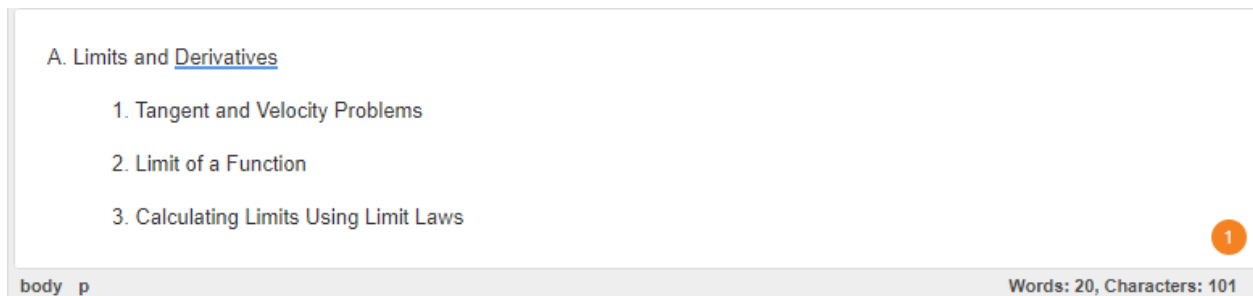

A screenshot of a Rich Text Editor interface. The top toolbar is the same as in the previous image. The main editing area contains a list with three items, each with a blue highlight:

- A. Limits and Derivatives
 - 1. Tangent and Velocity Problems
 - 2. Limit of a Function
 - 3. Calculating Limits Using Limit Laws

The status bar at the bottom indicates "body p" and "Words: 20, Characters: 101".

➤ To create indented levels, select the text you would like to indent. Click one of the Indent Tool buttons (in this case, Increase Indent).

A screenshot of a Rich Text Editor interface showing the result of applying the Indent Tool. The list from the previous image is now indented:

- A. Limits and Derivatives
 - 1. Tangent and Velocity Problems
 - 2. Limit of a Function
 - 3. Calculating Limits Using Limit Laws

The status bar at the bottom indicates "body p" and "Words: 20, Characters: 101".

Proposal Functions and Features - continued

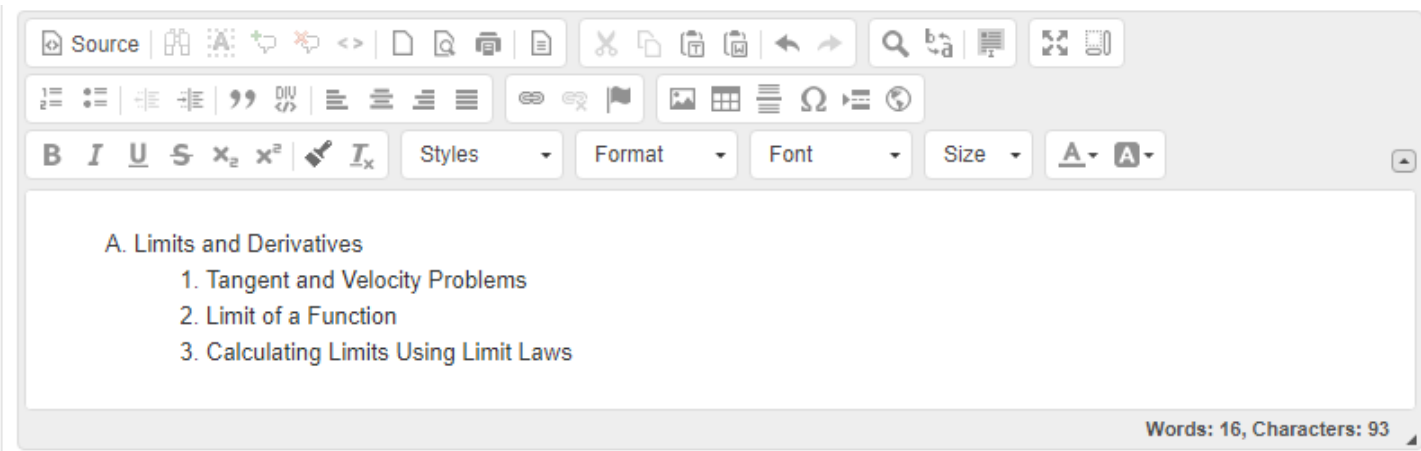

Rich Text Editor (RTE) - continued

Creating an Outline Using HTML

Another way to create a properly formatted outline requires knowledge of coding HTML.

Click the 'Source' button (1). This will change the view of the Rich Text Editor. Enter or copy and paste your content and HTML code as desired. (Note that the code itself does not add to the word or character count, only the content within the code tags.) When finished, click the Source button again to go back to normal view in the RTE.

If done correctly, this will produce an outline in the RTE.

Formatting a Table in the RTE

When adding tables to an RTE in META, whether in programs, courses or catalog pages, the default formatting may not be suitable for catalog output. This portion of the guide will help you have more control over the output format and appearance of tables when they are rendered in the online catalog.

Terminology

CSS

Cascading Style Sheets - a stylesheet language used for the formatting and presentation (layout and design) of a webpage.

Inline styles

Inline styles refer to using the style attribute to add CSS to a specific HTML element in order to style it individually.

Example: `<p style = "color:red;">This is a paragraph.</p>`

Bootstrap

Bootstrap is a CSS framework or library that includes a large variety of specific styling for the purpose of consistency across internal tools.

Getting Started

The catalog is based on Bootstrap, so the table output can be easily changed by applying some simple bootstrap styles. However, when pasting from another source such as Word, some styles are preserved in the paste.

These styles can interfere with any additional applied styles because inline styles have the highest specificity, or priority. In such cases it may be necessary to remove those styles before attempting to tweak the table appearance.

Having a clean table to begin with will make formatting much easier and less frustrating.

Cleaning Pasted Tables

When pasting tables either alone or as part of a larger document, there is often clutter that comes along with the code that is unnecessary and often detrimental to the appearance of the table.

When pasting, using Ctrl-V will invoke the paste from Word option that attempts to clean out the unnecessary elements. While this is quite effective, when dealing with tables there are some styles that cannot be removed. These are typically the inline styles used for cell-level formatting.

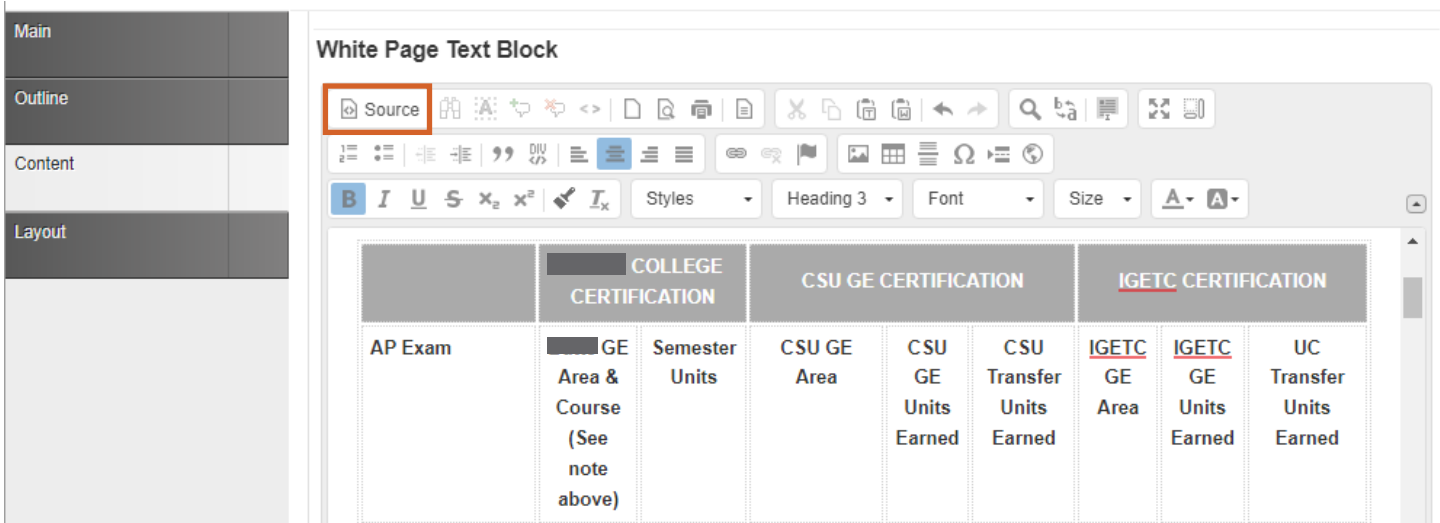

This may not be a problem and can be left as-is. Sometimes though, it is necessary to remove these styles to prevent overriding global styles from your catalog styles, from being applied to tables in content blocks.

The techniques in this tutorial can help with cleansing tables for better global control.

Formatting a Table in the RTE - continued

Technique: Global Search and Replace

When inline styles are applied in a table, they are usually applied at the cell level. This can make removing them time consuming. In such cases, you can use the 'Source' view and the replace option to remove them all en masse.

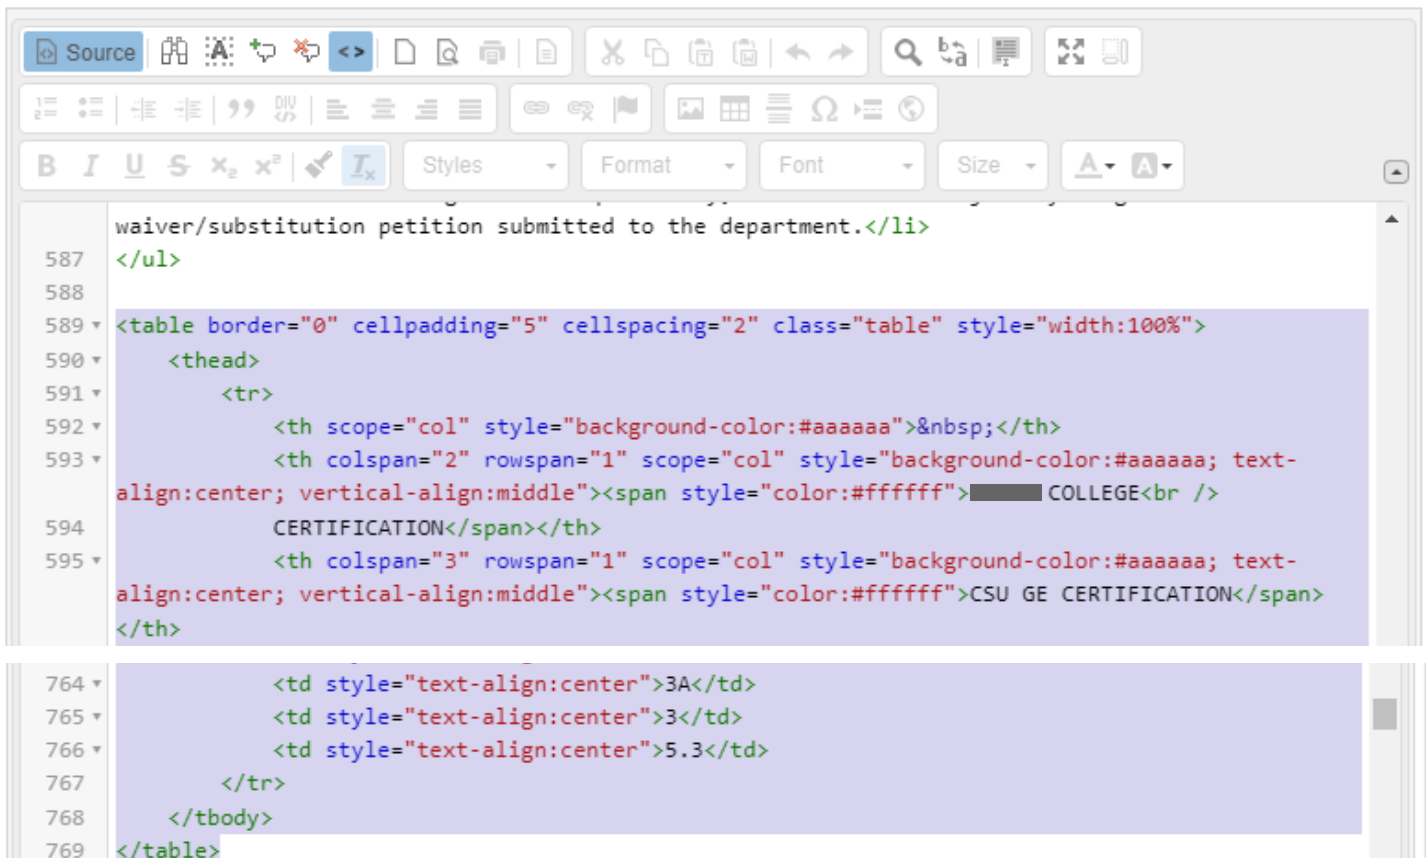

The screenshot shows the RTE editor interface. On the left is a sidebar with 'Main', 'Outline', 'Content', and 'Layout' tabs. The main area is titled 'White Page Text Block' and shows a table with the following structure:

	COLLEGE CERTIFICATION	CSU GE CERTIFICATION	IGETC CERTIFICATION				
AP Exam	GE Semester Area & Course Units (See note above)	CSU GE Area	CSU GE Units Earned	CSU Transfer Units Earned	IGETC GE Area	IGETC GE Units Earned	UC Transfer Units Earned

To do this, open a content block containing the table and click on the 'Source' button.

In the Source view, find the code for the table you want to change.

It will begin with a `<table>` tag and end with a `</table>` tag.

The screenshot shows the 'Source' view of the RTE editor. The HTML code for the table is highlighted in blue. The code is as follows:

```
587 </ul>
588
589 <table border="0" cellpadding="5" cellspacing="2" class="table" style="width:100%">
590 <thead>
591 <tr>
592 <th scope="col" style="background-color:#aaaaaa">&nbsp;</th>
593 <th colspan="2" rowspan="1" scope="col" style="background-color:#aaaaaa; text-align:center; vertical-align:middle"><span style="color:#ffffff">COLLEGE<br />
594 CERTIFICATION</span></th>
595 <th colspan="3" rowspan="1" scope="col" style="background-color:#aaaaaa; text-align:center; vertical-align:middle"><span style="color:#ffffff">CSU GE CERTIFICATION</span>
</th>
764 <td style="text-align:center">3A</td>
765 <td style="text-align:center">3</td>
766 <td style="text-align:center">5.3</td>
767 </tr>
768 </tbody>
769 </table>
```

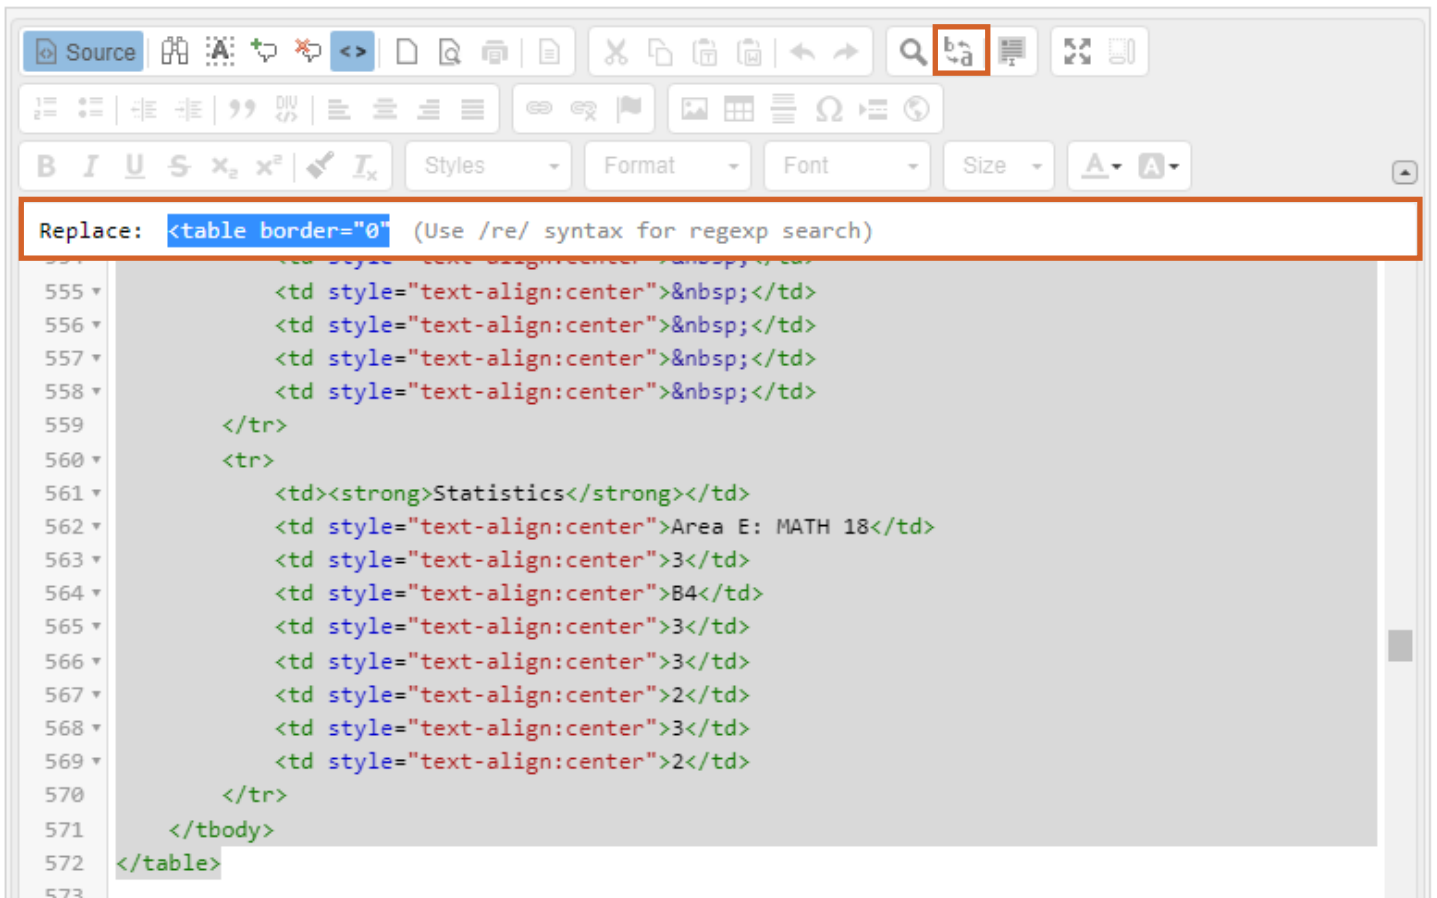

Formatting a Table in the RTE - continued

Technique: Global Search and Replace - continued

Everything between the `<table>` and `</table>` tags makes up the content of the table. Throughout the content you might see many `style=` statements. These affect the appearance of the cells of the table. Some may be desirable, but others can cause problems with formatting.

For example, if you want to control font size for the entire table with a single style, you will need to remove all the individual font size styles throughout the content first. You can do this with the search and replace function.

In this example we will remove the font-size style. First, we need to highlight all the table code.

 Place the cursor just before the `<table>` tag. Scroll down to the `</table>` tag and Shift-click immediately after that tag. This should highlight all the table code.

 Click the Replace button (the button to the right of the magnifying glass).

After clicking the Replace button, a `Replace:` field will appear below the toolbars (see screenshot above). You can add the text to find in this field. You can scroll through the highlighted code to see the various styles you may want to remove (see screenshot below with highlighted examples).

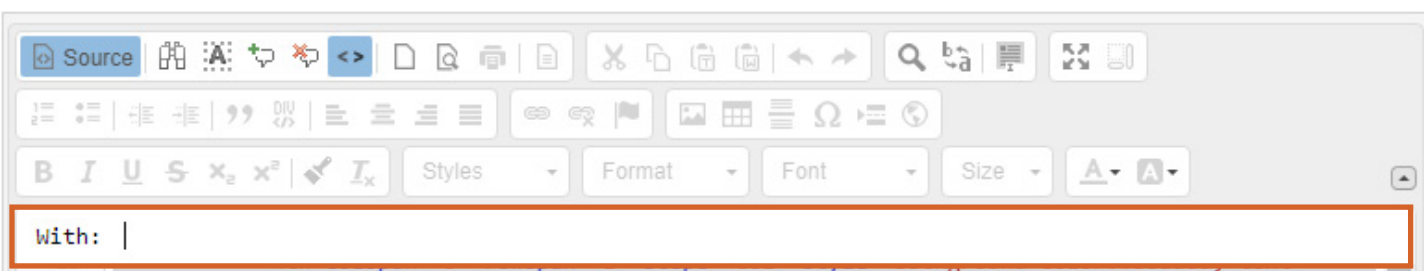

Formatting a Table in the RTE - continued

Technique: Global Search and Replace - continued

 In the `Replace:` field, enter `style="font-size:14px"` and press 'Enter.'

The `Replace:` field will now read `With:`

 Leave this field blank to remove the style and press 'Enter' again.

This will show the replace options.

 Press 'All' to immediately replace all occurrences. To step through individual replacements, press 'Yes' or 'No' for each one ('Yes' will replace, 'No' will not). To stop the replacement process, press 'Stop.'

Formatting a Table in the RTE - continued

Technique: Global Search and Replace - continued

In this specific example, only the `font-size` inline style has been removed from the ``. The span itself remains, but is now blank and will not affect the text.

```
18 <th colspan="3" rowspan="1" scope="col" style="background-color:#aaaaaa; text-align:center; vertical-align:middle"><span ><span style="color:#ffffff">CSU GE  
CERTIFICATION</span></span></th>  
19 <th colspan="3" rowspan="1" scope="col" style="background-color:#aaaaaa; text-align:center; vertical-align:middle"><span ><span style="color:#ffffff">IGETC  
CERTIFICATION</span></span></th>
```

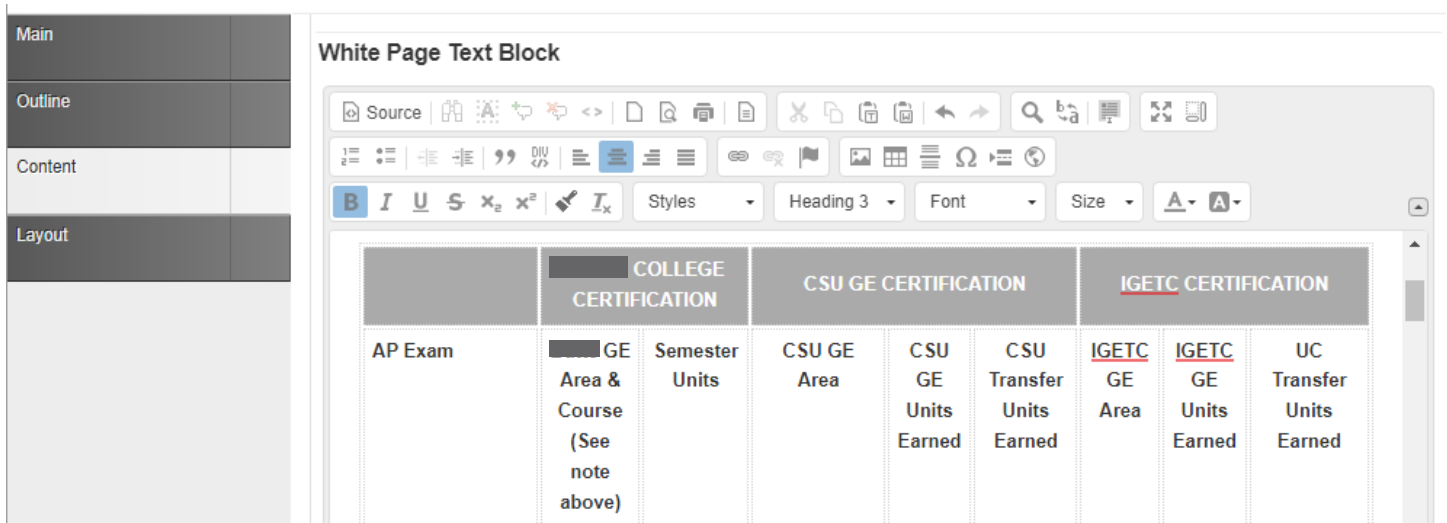

! NOTE: The global search and replace feature is best used by someone that is familiar with HTML. Make sure when doing global search and replacements that you include the entire statement you want removed.

If replacements leave HTML fragments, you will get unexpected results. If you don't feel comfortable using this feature, you can instead use the table editor user interface to make changes, though it will be a bit more time consuming.

Formatting a Table in the RTE - continued

Technique: Table Editor Interface

To use the table editor interface, you should first get familiar with the navigation and behaviors of the various tools.

The screenshot shows the RTE Table Editor Interface. On the left is a sidebar with tabs for Main, Outline, Content, and Layout. The main area is titled "White Page Text Block" and contains a table editor toolbar with various icons for text formatting, alignment, and insertion. Below the toolbar is a table with the following structure:

	COLLEGE CERTIFICATION		CSU GE CERTIFICATION			IGETC CERTIFICATION		
AP Exam	GE Area & Course (See note above)	Semester Units	CSU GE Area	CSU GE Units Earned	CSU Transfer Units Earned	IGETC GE Area	IGETC GE Units Earned	UC Transfer Units Earned

 To begin, open a content block containing a table. Click on the cells in the table.

As you click on the cells of the table, pay attention to the formatting options on the toolbar (e.g. Font, Size, etc.). If the cell has any of these formats set as an inline style, it will show.

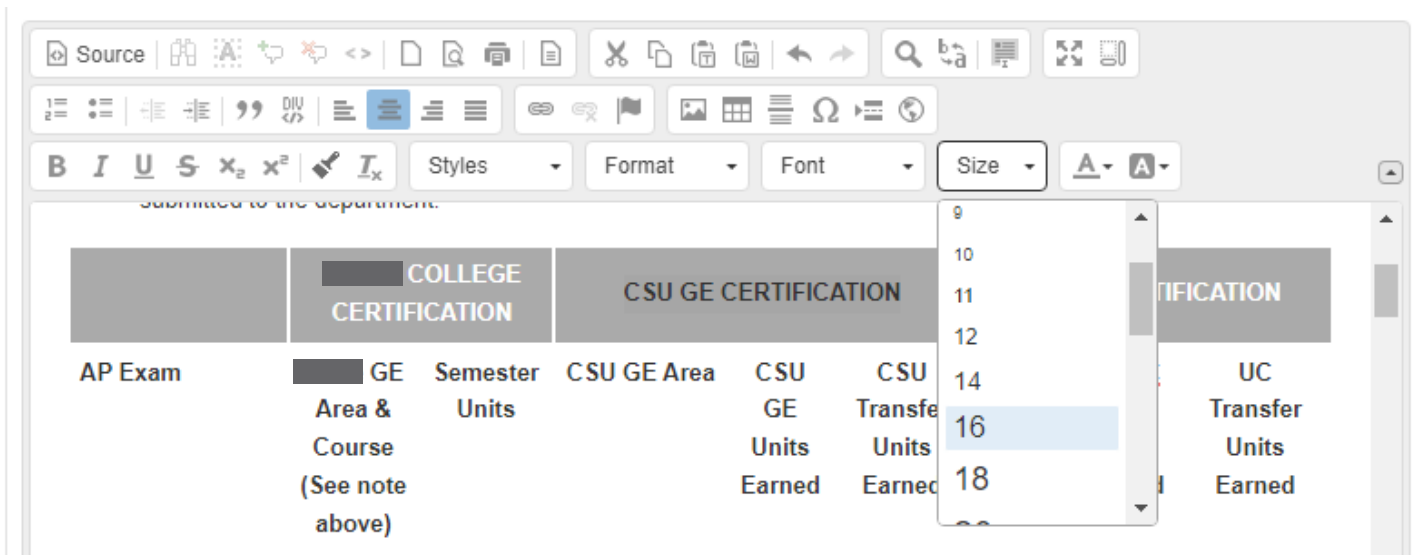

You can change any of these options on a cell-by-cell basis (see next page).

 NOTE: You can select multiple cells to set or clear styles. However, there are times when this may not work. In such cases, modify the cells individually.

Formatting a Table in the RTE - continued

Technique: Table Editor Interface - continued

Add Inline Style(s) to a Cell

The screenshot shows the RTE interface with a table. The table has several columns, including 'COLLEGE CERTIFICATION' and 'CSU GE CERTIFICATION'. A font size dropdown menu is open, showing options from 9 to 18. The value '16' is selected and highlighted in blue. The table content includes headers like 'AP Exam', 'GE Area & Course (See note above)', 'Semester Units', 'CSU GE Area', 'CSU GE Units Earned', 'CSU Transfer Units Earned', and 'UC Transfer Units Earned'.

 If you want to change the font size in a single cell, highlight the text in the cell and select the size value from the dropdown.

This will add an inline style attribute in the source.

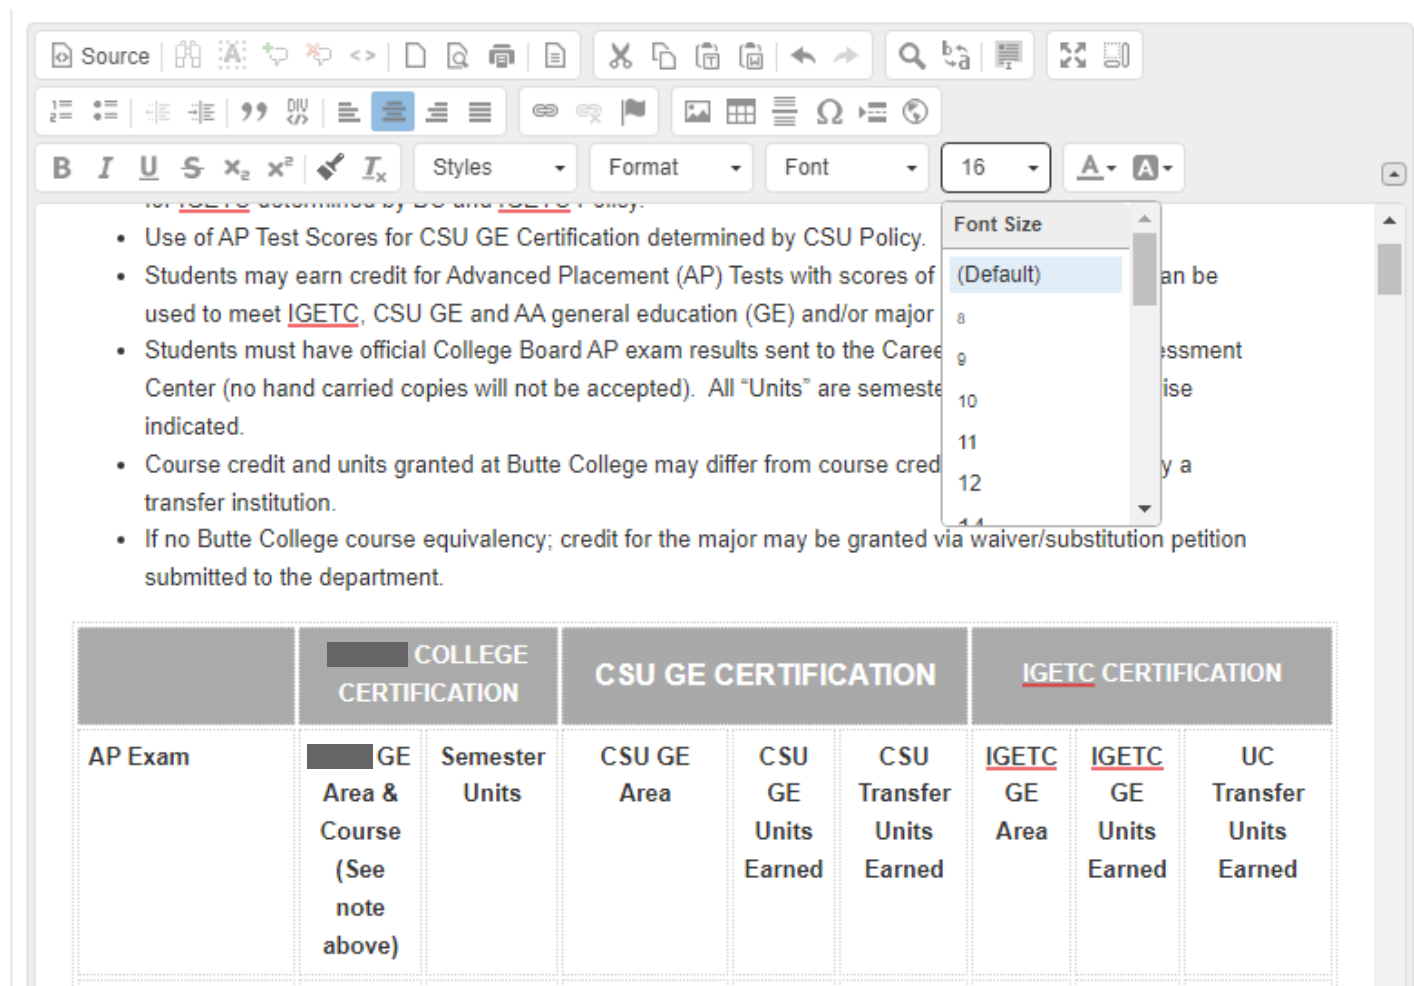

```
18 <th colspan="3" rowspan="1" scope="col" style="background-color:#aaaaaa; text-align:center; vertical-align:middle"><span style="font-size:16px"><span style="color:#ffffff">CSU GE CERTIFICATION</span></span></th>
19 <th colspan="3" rowspan="1" scope="col" style="background-color:#aaaaaa; text-align:center; vertical-align:middle"><span style="color:#ffffff">IGETC CERTIFICATION</span>
20 </tr>
```

 If you want, you can open the source and locate the text you highlighted. It will have a `` tag with the `font-size` style applied.

Formatting a Table in the RTE - continued

Technique: Table Editor Interface - continued

Remove Inline Style(s) from a Cell

for IGETC determined by CSU and IGETC Policy.

- Use of AP Test Scores for CSU GE Certification determined by CSU Policy.
- Students may earn credit for Advanced Placement (AP) Tests with scores of used to meet IGETC, CSU GE and AA general education (GE) and/or major
- Students must have official College Board AP exam results sent to the Career Center (no hand carried copies will not be accepted). All "Units" are semester indicated.
- Course credit and units granted at Butte College may differ from course credit transfer institution.
- If no Butte College course equivalency; credit for the major may be granted via waiver/substitution petition submitted to the department.

	COLLEGE CERTIFICATION		CSU GE CERTIFICATION			<u>IGETC</u> CERTIFICATION		
AP Exam	GE Area & Course (See note above)	Semester Units	CSU GE Area	CSU GE Units Earned	CSU Transfer Units Earned	<u>IGETC</u> GE Area	<u>IGETC</u> GE Units Earned	UC Transfer Units Earned

 If a cell has a font family or font size applied and you want to remove it, highlight the text and select (Default) from the dropdown.

This will remove the `` tag and associated style from the code (in this case, ``) and clear the style, restoring the text to its default font size.

```
18 <th colspan="3" rowspan="1" scope="col" style="background-color:#aaaaaa; text-align:center; vertical-align:middle"><span style="color:#ffffff">CSU GE CERTIFICATION</span>
19 <th colspan="3" rowspan="1" scope="col" style="background-color:#aaaaaa; text-align:center; vertical-align:middle"><span style="color:#ffffff">IGETC CERTIFICATION</span>
20 </tr>
```

Formatting a Table in the RTE - continued

Technique: Table Editor Interface - continued

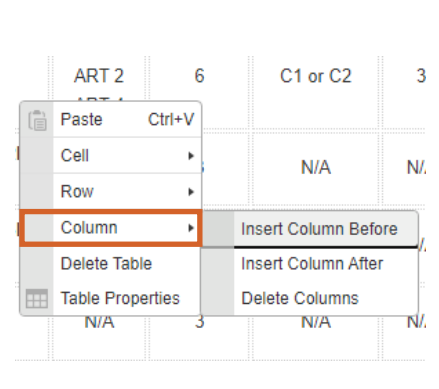

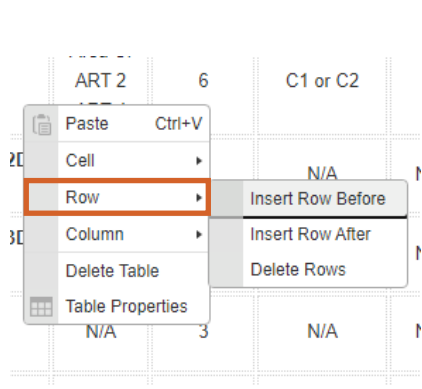

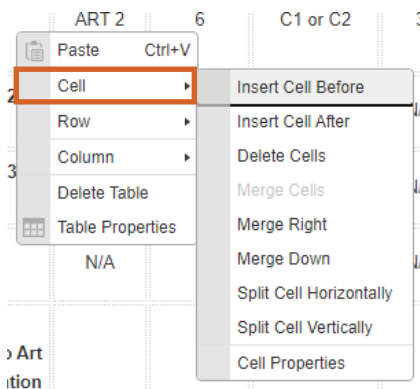

Using Context Menus to Modify Tables

In addition to the formatting tools on the toolbar, there are also context menus that give additional options for modifying table, row, column, and cell properties.

➤ To explore these tools, right-click anywhere in the table. This will open the context menu (see above).

Below are screenshots of the Cell, Row, and Column sub-menus, which include the ability to add and remove cells, rows and columns. See next page for more on the Cell sub-menu and its option 'Cell Properties'.

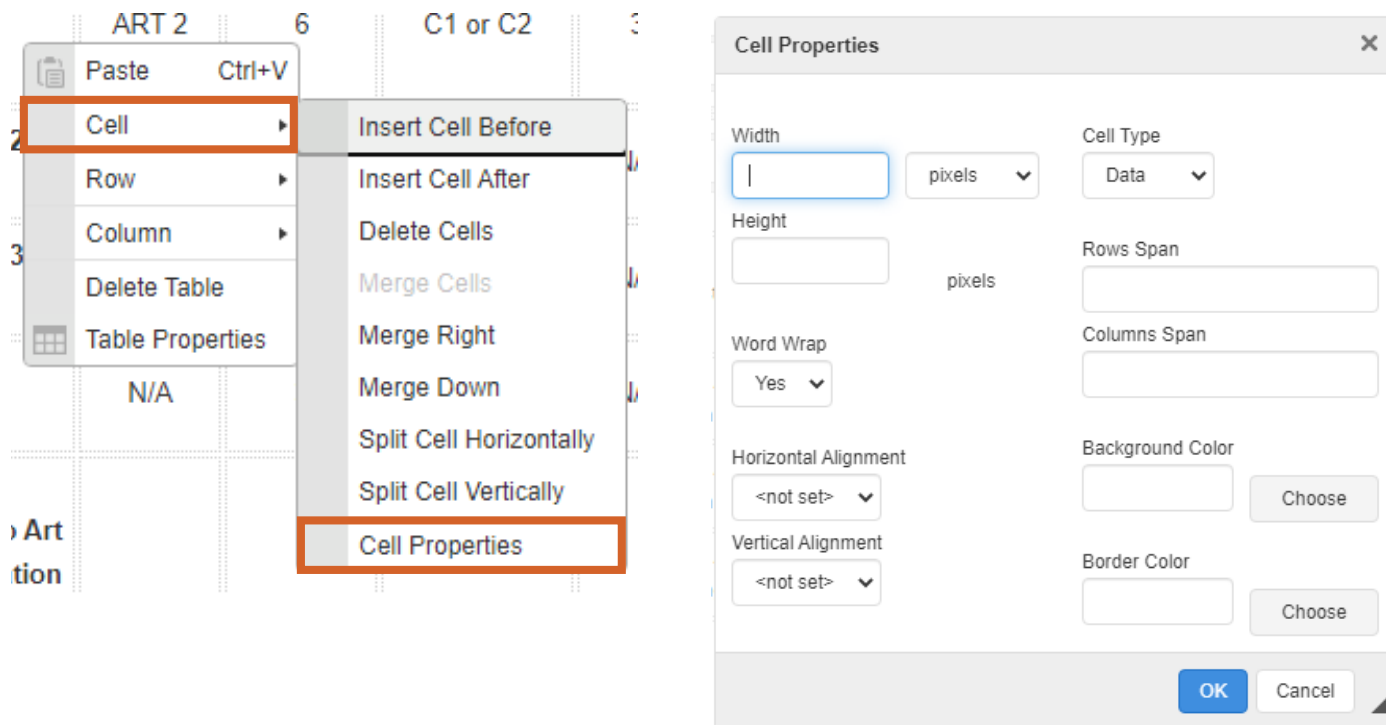

Formatting a Table in the RTE - continued

Technique: Table Editor Interface - continued

Cell Properties

The Cell sub-menu has a number of options for cell manipulation, as well as an option to open the cell attribute manager.

➡ *Hover over the Cell menu item until the sub-menu opens. Click on 'Cell Properties' to open the Cell Properties manager.*

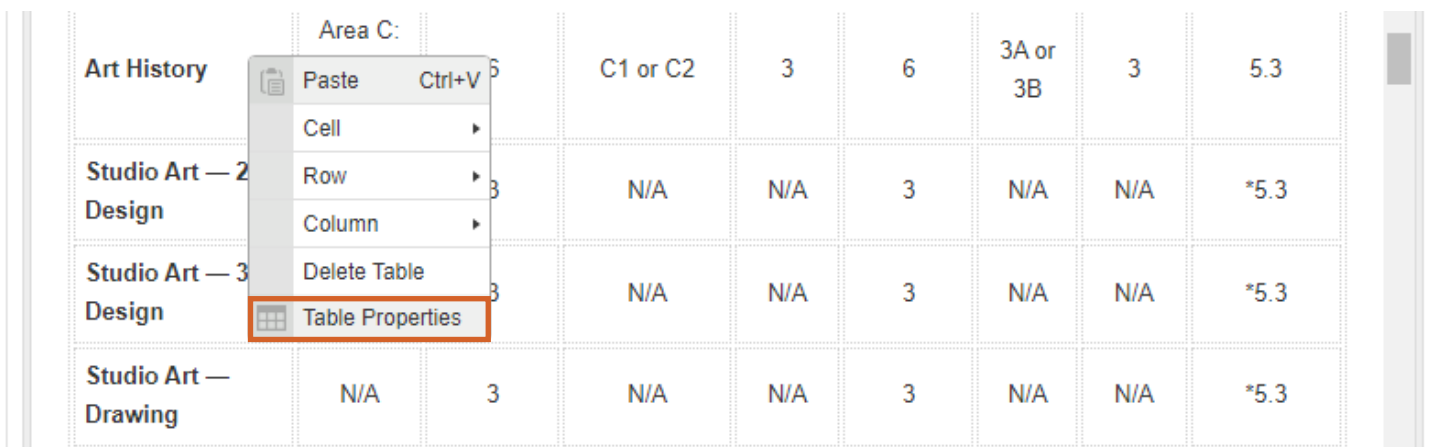

Each of the fields in the Cell Properties manager will add inline styles to the code to affect the appearance of the table cell. This can also be done for multiple cells by highlighting the desired cells and then right-clicking on the desired set of cells.

Experiment with different values for the fields in the Cell Properties manager to see how it affects the table layout and appearance.

Formatting a Table in the RTE - continued

Technique: Table Editor Interface - continued

Table Properties

Right-click anywhere in the table to bring up the context menu. Select 'Table Properties.' This will open the Table Properties manager.

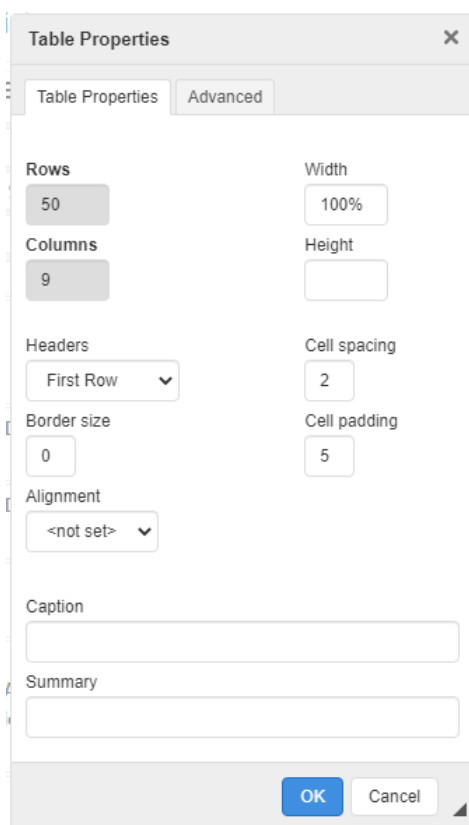

Table Properties

Table Properties | Advanced

Rows: 50 | Width: 100%

Columns: 9 | Height: []

Headers: First Row | Cell spacing: 2

Border size: 0 | Cell padding: 5

Alignment: <not set>

Caption: []

Summary: []

OK | Cancel

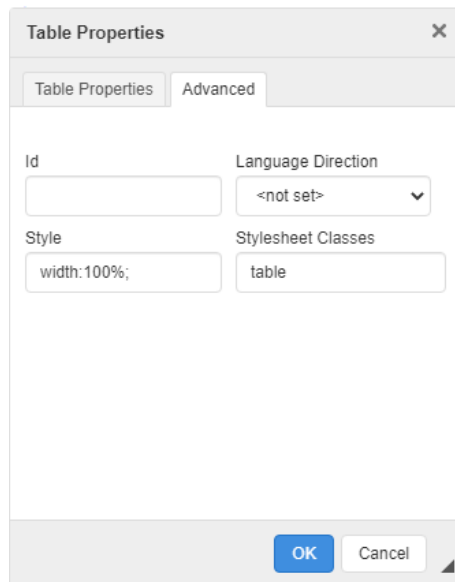

The Table Properties manager has two tabs. The first, Table Properties, controls various inline attributes for the table. Often there will be a width constraint when pasting from another source.

If you want your table width to be different or full width, you can change it here, or remove it for full responsive behavior. Experiment with different values to see how they affect the appearance and layout of the table.

Formatting a Table in the RTE - continued

Technique: Table Editor Interface - continued

Table Properties: Advanced

The screenshot shows a dialog box titled "Table Properties" with two tabs: "Table Properties" and "Advanced". The "Advanced" tab is selected. It contains several input fields and a dropdown menu. The "Id" field is empty. The "Language Direction" dropdown menu is set to "<not set>". The "Style" field contains the text "width:100%;". The "Stylesheet Classes" field contains the text "table". At the bottom of the dialog, there are "OK" and "Cancel" buttons.

The second tab, Advanced, contains more advanced options for styling.

The **Id** field is used to give your table a unique id. If you were to type "table-1" in the Id field, this is what the corresponding source code would look like in the `<table>` tag:

```
13 <table border="0" cellpadding="5" cellspacing="2" class="table" id="table-1" style="width:100%">
14 <thead>
15 <tr>
```

Similarly, if you were to add an id to your table (or change an existing id) by typing it directly into the source code, it would show and/or update in the Id field in the Advanced tab.

The **Language Direction** dropdown can be used to determine whether you want your cells to go Left to Right (LTR) or Right to Left (RTL). This depends largely on the language being used in the table (A table in Japanese, for example, would use RTL rather than LTR since it is read from right to left). This does not need to be changed or specified if the default setting for your table is already the correct setting.

If you were to specify a Language Direction in the Advanced tab, this is what the corresponding source code would look like in the `<table>` tag:

```
12
13 <table border="0" cellpadding="5" cellspacing="2" class="table" dir="ltr" style="height:100%; width:110%">
14 <thead>
15 <tr>
```

Similarly, if you were to type the language direction attribute into the source code, it would show and/or update in the Language Direction dropdown in the Advanced tab.

Formatting a Table in the RTE - continued

Technique: Table Editor Interface - continued

Table Properties: Advanced - continued

The **Style** field can be used to directly input additional inline `style=` attributes into the `<table>` tag. Currently, the only style attribute shown here is the width of the table. Height and other settings/attributes are not specified and are using defaults.

(You can also see on p. 132 that the value in the Width field in the Table Properties tab, which is set at 100%, corresponds to the inline style attribute for width in both the Style field in the Advanced tab and in the source code.)

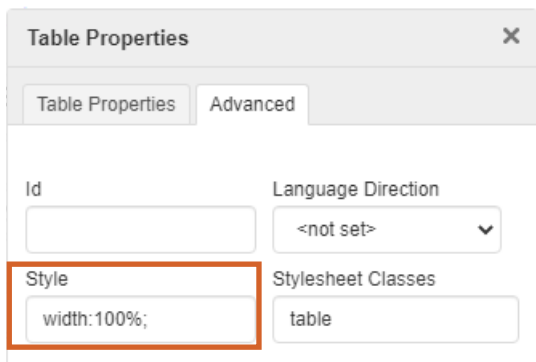

Table Properties

Table Properties | Advanced

Id:

Language Direction: <not set>

Style: width:100%;

Stylesheet Classes: table

If you were to change the width in either the source code, the Style field in the Advanced tab, or the Width field in the Table Properties tab, all three would update accordingly. This would also be true if you changed or added another style attribute or setting in any of the three.

Let's examine this by changing the Width to 110% and setting the Height to 100% in the Table Properties tab:

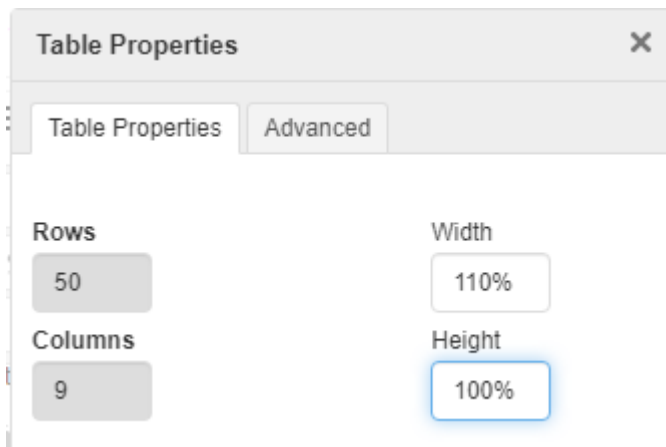

Table Properties

Table Properties | Advanced

Rows: 50

Columns: 9

Width: 110%

Height: 100%

  *Navigate to the Table Properties tab, change the width and set the height, and click 'OK'.*

Formatting a Table in the RTE - continued

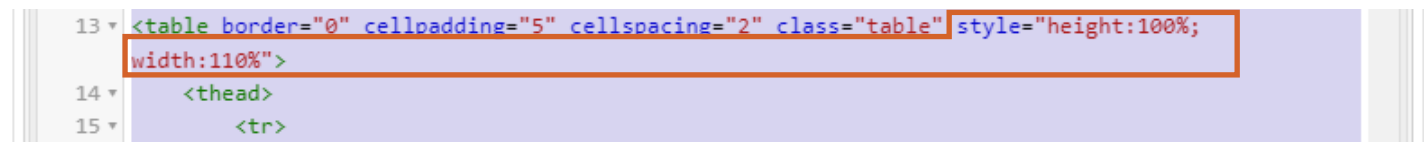

Technique: Table Editor Interface - continued

Table Properties: Advanced - continued

Now the width has been updated in the source code and in the Style field in the Advanced tab, and an additional inline style attribute has been added for height (in this case, the actual height of the table has not changed since the default was already 100%, but it is now explicitly noted in the settings and code).

The screenshot shows the 'Table Properties' dialog box with the 'Advanced' tab selected. The 'Style' field is highlighted with a red box and contains the text 'height:100%;width:110%'. The 'Stylesheet Classes' field contains the text 'table'.

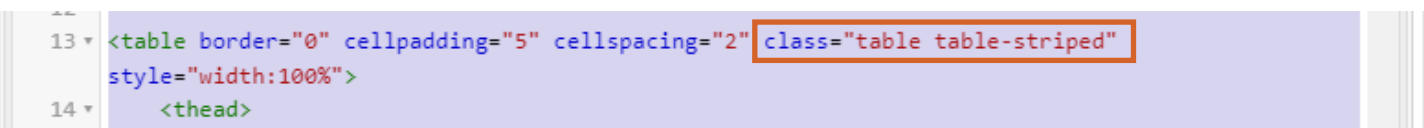

```
13 <table border="0" cellpadding="5" cellspacing="2" class="table" style="height:100%;  
14 <thead>  
15 <tr>
```

Whether particular style attributes are changed or added by directly typing them into the source code, inputting them into the Style field in the Advanced tab, or by editing the corresponding setting in the Table Properties tab, the outcome is the same.

The **Stylesheet Classes** field is used to give your table a styling class. A class can be applied to multiple tables and does not have to be unique like an id. There can be more than one class applied to a table, separated by spaces.

This table currently has a single class of “table” (noted in both the Stylesheet Classes field in the Advanced tab and in the source code). The “table” class is a pre-defined Bootstrap class. If you were to add an additional class “table-striped” in the Stylesheet Classes field, this is what the corresponding source code would look like in the `<table>` tag:

```
13 <table border="0" cellpadding="5" cellspacing="2" class="table table-striped"  
14 <thead>
```

Similarly, if you were to add or edit a table class in the source code, it would show and/or update in the Stylesheet Classes field in the Advanced tab. (See next page for additional pre-defined Bootstrap classes.)

NOTE: It is recommended that you clear the Style and Stylesheet Classes fields after pasting a table from another source, especially if the Stylesheet Classes field contains one of the Mso styles. Any style prefixed with Mso comes from a paste from Word. They have no effect in the output, so they are unnecessary clutter.

Formatting a Table in the RTE - continued

Technique: Bootstrap Styling

There are several pre-defined Bootstrap styles/classes that can be used to control output layout and styling. These can be typed directly into the source code or used in the Stylesheet Classes field in Table Properties > Advanced (as detailed on the previous page).

Below are just a few. Most of these can be used at the same time, as long as they do not conflict.

table

This style must be used in conjunction with all other table styles listed here.

table-striped

This adds a subtly different coloring to alternate rows for greater visibility.

table-dark

This inverts the colors of the table to light text on a dark background.

table-bordered

This adds additional table borders around and between columns.

table-borderless

This removes borders from the table cells, rows, and columns. (Note: table-bordered and table-borderless cannot be used in conjunction with each other - only one or the other can be used.)

table-hover

This highlights rows as the mouse passes over.

Experiment with these styles to see how the catalog output is affected. Once you are familiar with the behaviors, you can then combine other table attributes in the Table Properties manager or in the source code to further tweak the output.

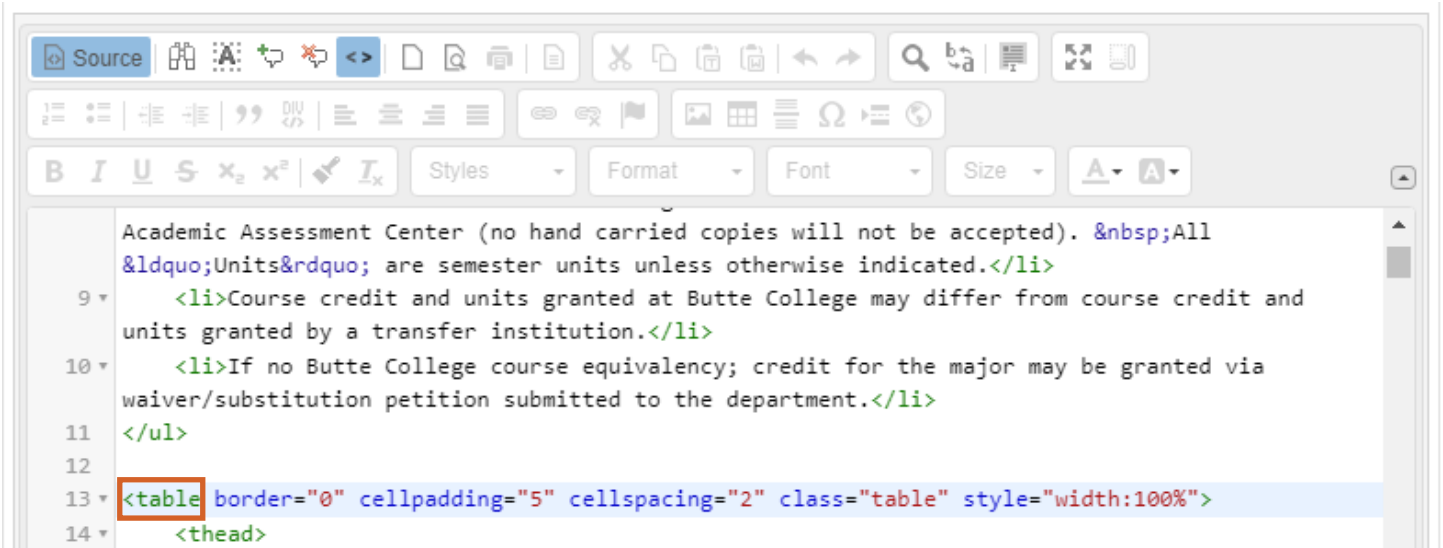

One of the drawbacks to tables is how they display on mobile devices. As the screen size decreases, it becomes impossible to show all columns. (See next page for how to make tables responsive on smaller devices.)

Formatting a Table in the RTE - continued

Technique: Responsive Tables

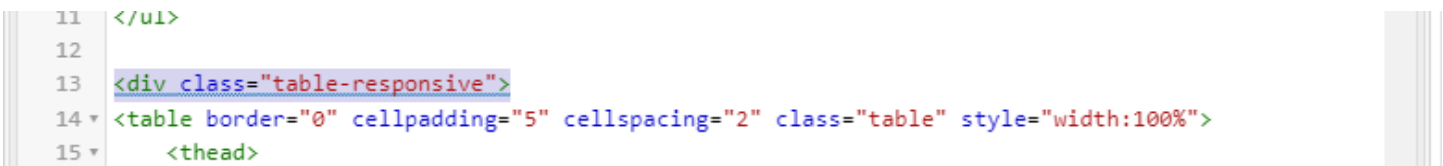

- NOTE: This is advanced functionality. If you're comfortable editing the HTML code for the document, you can add the ability for the table to act responsively when viewed on smaller devices such as a tablet or phone.

To make a table responsive, the table will need to be wrapped in a `<div>` tag.

```
Academic Assessment Center (no hand carried copies will not be accepted). &nbsp;&nbsp;&nbsp;All  
&ldquo;Units&rdquo; are semester units unless otherwise indicated.</li>  
9 <li>Course credit and units granted at Butte College may differ from course credit and  
units granted by a transfer institution.</li>  
10 <li>If no Butte College course equivalency; credit for the major may be granted via  
waiver/substitution petition submitted to the department.</li>  
11 </ul>  
12  
13 <table border="0" cellpadding="5" cellspacing="2" class="table" style="width:100%">  
14 <thead>
```

- Open the content block and click the Source button in the RTE. Locate the table start tag `<table>`.

```
11 </ul>  
12  
13 <div class="table-responsive">  
14 <table border="0" cellpadding="5" cellspacing="2" class="table" style="width:100%">  
15 <thead>
```

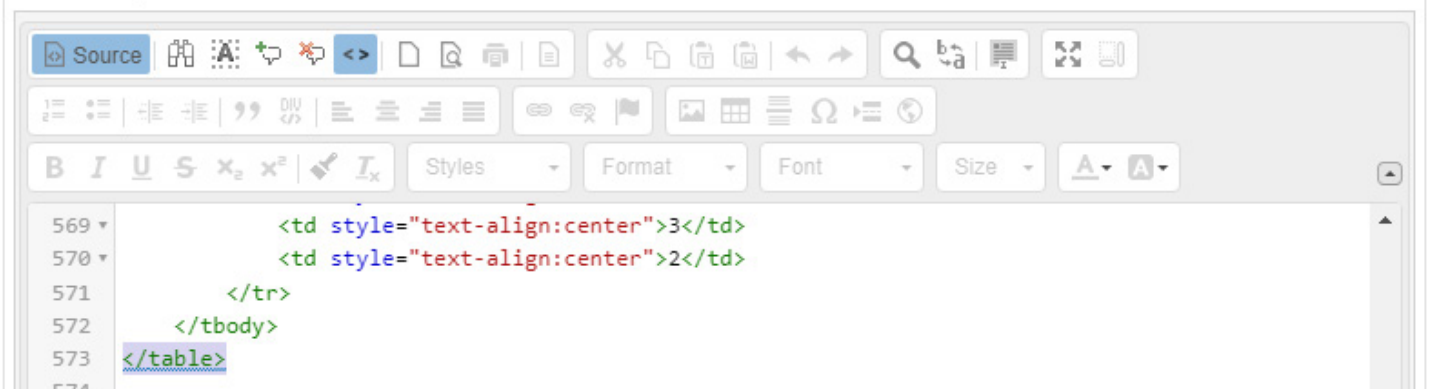

- Place the cursor at the beginning of the line and insert a new line to make room for the `<div>` wrapper. Add the following:
`<div class="table-responsive">`.

- NOTE: The RTE will automatically insert a closing `</div>` tag right after the one you just entered in an effort to ensure well-formed HTML.

- Delete the closing `</div>` tag added by the editor since you will be adding it at the end of the table definition.

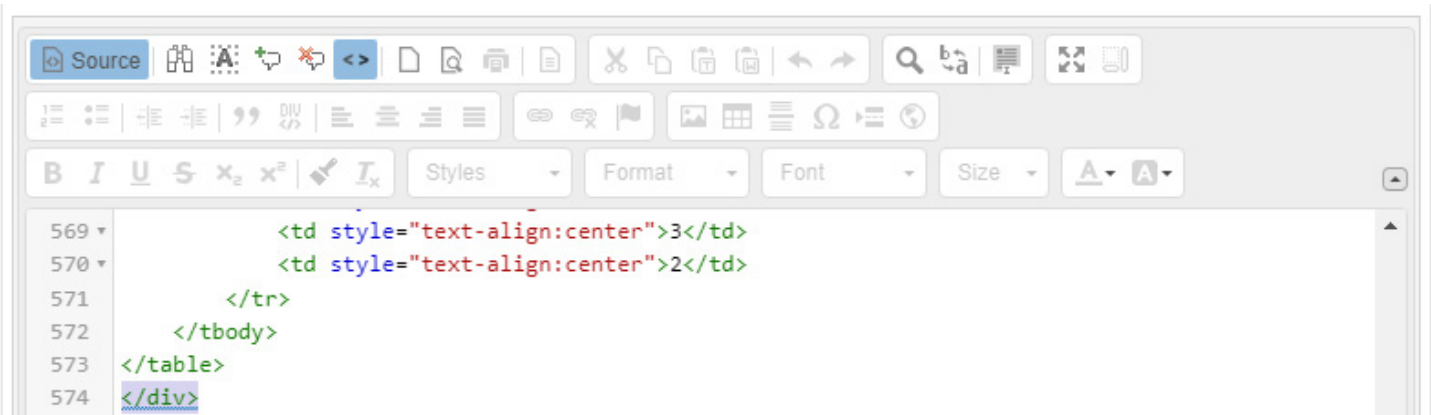

Formatting a Table in the RTE - continued

Technique: Responsive Tables - continued

```
569 <td style="text-align:center">3</td>
570 <td style="text-align:center">2</td>
571 </tr>
572 </tbody>
573 </table>
574
```

Find the closing `</table>` tag for the same table you are editing. If you have more than one table, be careful that you choose the closing tag for the table you are editing rather than a closing tag for another table.

```
569 <td style="text-align:center">3</td>
570 <td style="text-align:center">2</td>
571 </tr>
572 </tbody>
573 </table>
574 </div>
```

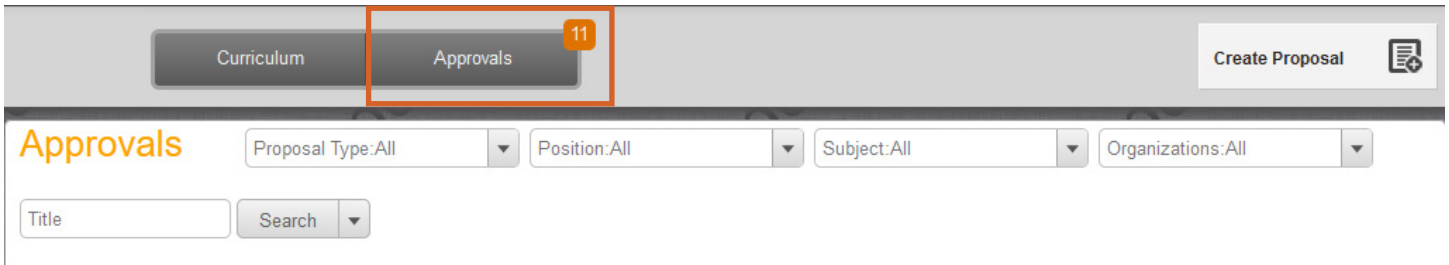

Immediately after the closing `</table>` tag, enter a new line. Add a closing `</div>` tag to close out the wrapper.

As the screen size reduces, the table will reformat itself as much as it can until it is no longer possible to display everything. At that point, a horizontal scroll bar will appear at the bottom of the table to allow for scrolling, or on touch devices, it will be swipe scrollable.

Approvals

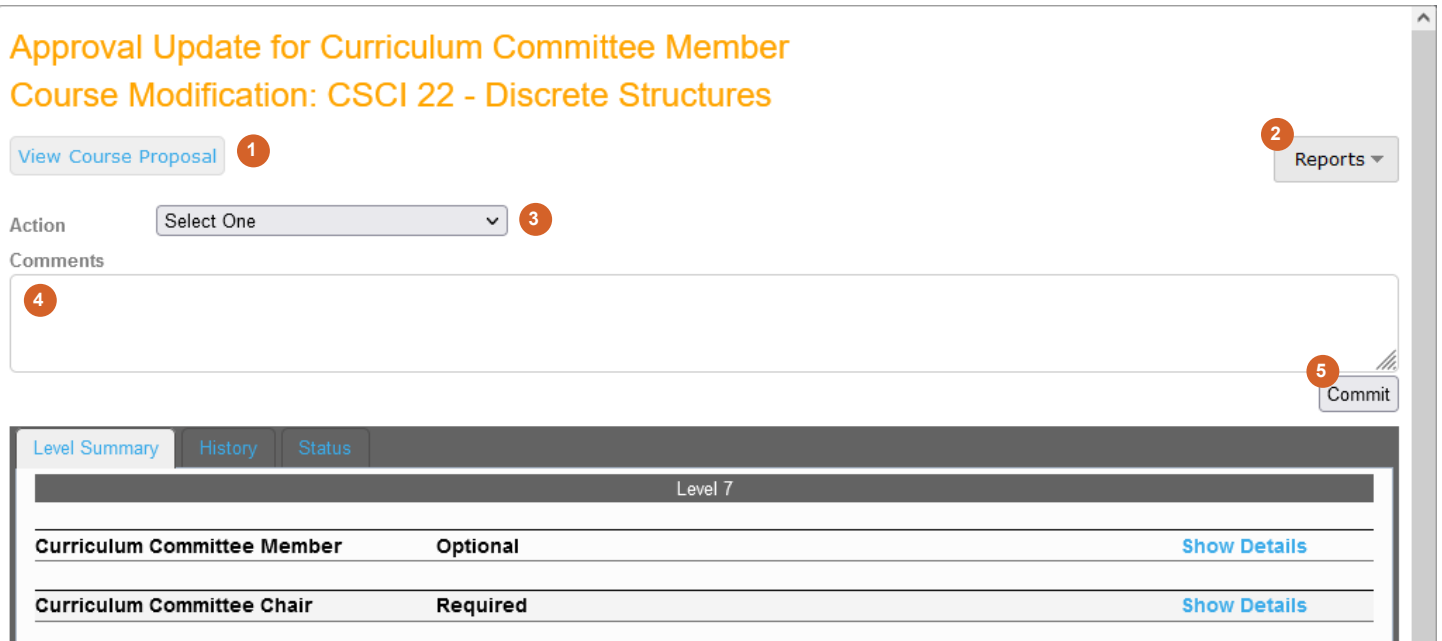

To view pending approvals, click the **Approvals** button at the top of any page. If you have any approvals waiting for you, there will be an orange box with a number in it attached to the **Approvals** button. The process is similar for all proposal types.

The standard user without administrative privileges will not be able to see the **All Approvals** option. They will only be able to see approvals for which they are the originator or the next member of the approval process.

If you are the next user in the approval process, you will see a screen like the one below.

The Approval History page shows what has happened in the approvals process for this proposal and who is next in line. It also shows the actions that have been taken on the proposal, the time and date each action was taken, and a permanent history of comments ('Show Details' may need to be clicked to show details for actions each position has taken).

 If you wish to view the course, you can select *View Proposal* (1). You may also view any available reports by clicking the *Reports* button (2). Use the *Action* dropdown menu (3) to select the action you wish to take on the proposal. Add any *Comments* (4), and then click *Commit* (5). When you make a comment, it will become a permanent part of the comments once you click *Commit*.

Committing your actions will move the proposal to the next part of the approval process. If you reject the proposal, it will remove the proposal from the system. If you request changes, it will send the proposal back to the originator. Once these changes have been made, the proposal will return to the person who requested the changes.

Approvals - continued

Make sure you see a confirmation message to confirm that when you clicked **Commit**, the action was received. The confirmation will appear in a popup window.

☞ *You must click 'Close to continue' to ensure your actions are committed.*

This is vital. If you do not see this popup, your action has not been saved, and you must perform your action again.

Implementing or Publishing Curriculum

To implement a curriculum proposal and add it to the college's offerings, the last user in the approval process must select **Implement** (or equivalent) from the action menu.

Approval Update for Curriculum Analyst

New Course: ACCTG 1001 - Test

[View Course Proposal](#) Reports ▾

Position Curriculum Analyst

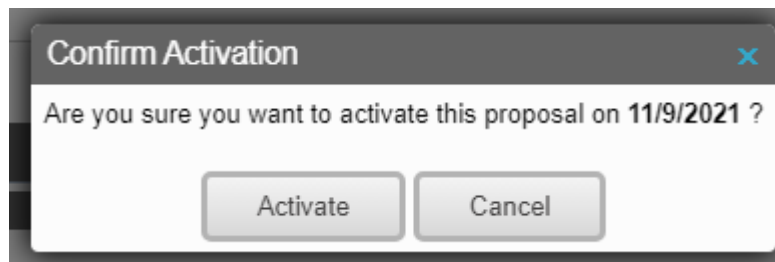

Action 1

Activation date 2

Comments

3

  *If you are the last user in the approval process, select the Implement action from the action menu (1). Select the Activation Date - the date the course will become active - by clicking on the Calendar icon (2). Add any comment necessary and click Commit (3).*

 *You must confirm the final action by clicking Activate in the popup window that will appear. To cancel activation, click Cancel.*

Clicking the Activate button in the popup **is a vital action** to activate the proposal. If you do not see this popup, your action has not been saved, and you must perform it again.
