

Course Outline

COURSE: JFT 10 **DIVISION:** 50 **ALSO LISTED AS:**

TERM EFFECTIVE: Spring 2020 **CURRICULUM APPROVAL DATE:** 06/09/2020

SHORT TITLE: FIRE FIGHTER II

LONG TITLE: Fire Fighter II

<u>Units</u>	<u>Number of Weeks</u>	<u>Type</u>	<u>Contact Hours/Week</u>	<u>Total Contact Hours</u>
3.5	18	Lecture:	1.12	20.16
		Lab:	6	108
		Other:	0	0
		Total:	7.12	128.16
		Total Learning Hrs:	168.48	

COURSE DESCRIPTION:

This course is the second in a series of courses that provides the skills and knowledge needed for entry level professional fire fighter to perform his/her duties safely, effectively, and competently. The five overarching themes of the California State Fire Fighter II curriculum are: general knowledge germane to the profession, fire department communications, fireground operations, rescue operations, and prevention, preparedness, and maintenance. **PREREQUISITE:** Fire Fighter I

PREREQUISITES:

Completion of JFT 225, as UG, with a grade of C or better.

COREQUISITES:

CREDIT STATUS: D - Credit - Degree Applicable

GRADING MODES

L - Standard Letter Grade

REPEATABILITY: N - Course may not be repeated

SCHEDULE TYPES:

- 02 - Lecture and/or discussion
- 03 - Lecture/Laboratory
- 04 - Laboratory/Studio/Activity

STUDENT LEARNING OUTCOMES:

By the end of this course, a student should:

1. Identify and describe the role and responsibilities of a Fire Fighter II within the organization, Fire Fighter certification track, determine the need for command, and organize and coordinate activities using the information provided.
2. Identify the advantages and disadvantages of smooth bore, fog, and foam nozzles for foam application and demonstrate various foam application techniques.
3. Given report forms, guidelines, and information, will be able to complete a basic incident report that completely and accurately records all pertinent information.

CONTENT, STUDENT PERFORMANCE OBJECTIVES, OUT-OF-CLASS ASSIGNMENTS

Curriculum Approval Date: 06/09/2020

8 Hours

Content: Unit I - Fire Fighter II Certification Process

1. The different levels of certification in the Fire Fighter II certification track
2. Identify any other requirements for Fire Fighter II
3. Describe the capstone task book process
 - a. Prerequisites and course work
 - b. Fees and request capstone task book
 - c. Job performance requirements
 - d. Identified evaluator
- II. General Knowledge Requirements
 1. Responsibilities of the Fire Fighter II in performing assigned duties in conformance with applicable NFPA standards and other safety regulations and AHJ procedures
 2. The role of a Fire Fighter II within the organization
 3. The need for command
 4. The responsibilities of the Fire Fighter
- II Assuming and transferring command within the incident management system
 - a. Size-up
 - b. Arrival report
 - c. Initial strategies and tactics or initial incident action plan (IAP)
 - d. Assign resources
 - e. Implement the incident command system
 - f. Complete transfer of command briefing
 - g. Incident management system

Lab content:

8 Hours

Content: Unit 2: Fire Department Communications

- 1: Completing Incident Reports
 - a. Content requirements for basic incident reports
 - b. The purpose and usefulness of accurate reports
 - c. Consequences of inaccurate reports
 - d. Obtain necessary information
 - e. Required coding procedures
 - f. Necessary codes
 - g. Proofread reports
 - h. Skills - Operate fire department computers or other equipment necessary to complete reports

2: Basic Company Communications

- a. Standard operating procedures for alarm assignments
- b. Fire department radio communication procedures
- c. Skills - Operate fire department radio communications equipment

70 Hours

Content: Unit 3: Fireground Operations

I. Extinguishing an Ignitable Liquid Fire

- a. Methods by which foam prevents or controls a hazard
- b. Principles by which foam is generated
- c. Causes for poor foam generation and corrective measures
- d. The difference between hydrocarbon and polar solvent fuels and the concentrates that work on each
- e. Characteristics, uses, and limitations of firefighting foams
- f. Advantages and disadvantages of using fog nozzles versus foam nozzles for foam application
- g. Foam stream application techniques
- h. Hazards associated with foam use
- i. Methods to reduce or avoid hazards

Skills

- a. Prepare foam concentrate supply for use
- b. Assemble foam stream components
- c. Demonstrate various foam application techniques
- d. Approach and retreat from spills as part of a coordinated team

2: Controlling a Flammable Gas Cylinder Fire

- a. Characteristics of pressurized flammable gases
- b. Elements of a gas cylinder
- c. Effects of heat and pressure on closed cylinders
- d. Boiling liquid expanding vapor explosion (BLEVE) signs and effects
- e. Methods for identifying contents
- f. Alternative actions related to various hazards and when to retreat

Skills

- a. Apply various techniques for water application
- b. Assess cylinder integrity and changing cylinder conditions
- c. Operate control valves

3. Controlling a Flammable Gas Cylinder Fire

- a. Characteristics of pressurized flammable gases
- b. Elements of a gas cylinder
- c. How to identify safe havens before approaching flammable gas cylinder fires
- d. Valve types and their operation

Skills

- a. Apply various techniques for water application
- b. Assess cylinder integrity and changing cylinder conditions
- c. Operate control valves
- d. Choose effective procedures when conditions change
4. Protecting Evidence of Fire Cause and Origin
 - a. Methods to assess origin and cause
 - b. Types of evidence
 - c. Relationships of the Fire Fighter
II, criminal investigators, and insurance investigators in fire investigations
 - e. The effects and problems associated with removing property or evidence from the scene

20 Hours

Content: Unit 4: Rescue Operations

1. Vehicle Extrication
 - a. The fire departments role at a vehicle accident
 - b. Strength and weakness in auto body construction
 - c. Dangers associated
 - d. uses and limitations of hand and power tools
 - e. Forcible Entry
 - f. Stabilization tools and equipment
2. Assisting in Rescue Operations
 - a. Fire fighters role and a technical rescue operation
 - b. Types and uses for rescue tools
 - c. Rescue practices and goals
 - d. Establish public barriers

14 Hours

Content: Unit 5: Prevention, Preparedness, and Maintenance

1. Performing a Fire Safety Survey at a Private Dwelling
 - a. Organizational policy and procedures
 - b. Common Causes of fire and their prevention
 - c. The importance of a fire safety survey and public fire education program
 - d. Recognize Hazards
2. Presenting Fire Safety Information
 - a. Types of informational material
 - b. Basic Presentation skills
 - c. Document presentations
3. Preparing Preincident Surveys
 - a. Sources of water supply for fire protection
 - b. Fundamentals of fire suppression and detection systems
 - c. Components of fire suppression and detection systems
 - d. Related departmental forms
4. Maintaining Power Equipment
 - a. Manufacturer and departmental guidelines for maintaining equipment
 - b. Types of cleaning methods
 - c. Correct use of cleaning solvents
 - d. Correct tools
 - e. Guidelines

Skills

- a. Operate power plants, power tools, and lighting equipment
- b. Complete recording and reporting procedures
- 5. Performing Annual Hose Service Test
 - a. Procedures
 - b. Recording procedures

METHODS OF INSTRUCTION:

Skills Demonstration, Lecture, Scenario Training

OUT OF CLASS ASSIGNMENTS

Required Outside Hours: 40

Assignment Description:

Reading assignments from text book.

METHODS OF EVALUATION:

Objective examinations

Percent of total grade: 40.00 %

Written State Fire Training exam to be evaluated by instructor using State Fire Training standards.

Skill demonstrations

Percent of total grade: 60.00 %

State Fire Training skills exam to be evaluated by instructor using SFT standards.

REPRESENTATIVE TEXTBOOKS:

International Association of Fire Chiefs; National Fire. Fundamentals of Fire Fighter Skills, Jones and Bartlett Learning, . Jones and Bartlett Learning ,2020.

ISBN: 9781284144611

Required Other Texts and Materials

Fire Engineering Handbook (Lab Manual) for Fire Fighter I and Fire Fighter II, ISBN: 978-1-5970-135-2
